NEXT BILLION CHILDREN

STARTUP TACTICS · SALES: EARLY CUSTOMER DEMAND GENERATION

EARN THE FIRST YES.

Team NBC (Next Billion Children)

Sam Quansah · Vera Aninakwah · Nana Adwoa Nsiah · Deborah Quansah

Fall 2026 · Tactic week Wed 14 – Tue 20 Oct 2026 · Outreach designed; sending starts Wed 14 Oct

Full brand guide (PDF) · Outreach kit and lead-list template on GitHub

THE VENTURE

AI GIVES ANSWERS. CHILDREN STILL NEED TO BUILD.

AI makes answers cheap, but the chance for children to investigate, build, get it wrong and try again is still costly. NBC builds **Physical AI for learning: programmable physical environments where children build, experiment and develop capabilities with shared AI**, starting from five years of Algo Peers practice in Cape Coast, Ghana.

PROGRAMMABLE ENVIRONMENTS

Learning Worlds built from programmable materials: build, predict, test, revise.

EVIDENCE

What a child demonstrated, under what conditions and with what help.

SHARED AI

One AI per learning centre supports the facilitator. No device per child.

THE BRIEF

FIND THE PEOPLE WHO WILL SAY YES.

PROGRAM OWNERS KNOW THE PROBLEM.

People who run hands-on programs reply when we describe their week: a great session is hard to run twice.

SCHOOLS WANT TO SEE RESULTS.

Heads and STEM coordinators reply to a pilot place and a one-page summary of what pupils did.

SPONSORS FUND WHAT THEY CAN REPORT.

CSR and foundation teams reply to a pilot for children who can’t pay, with a clear report at the end.

The experiment: three profiles, 50+ leads each, three messages and a four-touch sequence. We count replies and pilot calls booked, not opens.

SENDING FROM WED 14 OCT

01

THE PLAN

What we want from outreach, what we expect, and how we will measure it.

EXPERIMENT OUTLINE · PART 1

WHAT WE WANT FROM THIS TACTIC.

TEN CONVERSATIONS

Ten first calls with people who could buy, host or fund an NBC pilot.

THREE PILOT OFFERS

Three program owners willing to discuss a paid pilot with a stated price.

A SYSTEM WE CAN REUSE

A lead list, messages and follow-ups any teammate can use in a new city or country.

EXPERIMENT OUTLINE · PART 2

WHAT WE EXPECT.

H1 · PROGRAM OWNERS	At least 15% of hands-on program owners reply when the message describes their problem: running a great session without their best facilitator.
H2 · SCHOOL LEADERS	At least 10% of heads and STEM coordinators at private and mission schools reply to a pilot place and a summary of what pupils did.
H3 · SPONSORS	At least 8% of CSR and foundation officers reply to a sponsored pilot with a clear report.

Reply-rate targets are set before sending. A reply is a human answer, positive or negative.

EXPERIMENT OUTLINE · PART 3

THE EXPERIMENT.

BUILD

50+ leads per profile from public directories and networks, every row sourced.

WRITE

One core message per profile, plus three follow-ups.

SEND

25+ first messages in week one; the rest in week two, from our own accounts.

TRACK

Every touch logged in our CRM: sent, replied, call booked, pilot offer.

LEARN

Revise the weakest message after 25 sends; compare reply rates by profile.

Rules we keep: adults only, reached in their professional role. No children are contacted or targeted. We message one person at a time, honour every opt-out at once, and never buy contact lists.

02

THE TARGETS

Where to find buyers, and the three kinds of people we will write to.

TARGETS · ORGANISATIONS (B2B)

UPDATED ON GITHUB DURING TACTIC WEEK

WHERE TO FIND BUYERS.

PROGRAM OWNERS

Code Club and micro:bit community maps

Africa Code Week and similar partner lists

Makerspace and STEM-club directories

LinkedIn: "STEM program director", "after-school founder"

SCHOOLS

National private-school council member lists

Mission and faith school networks

Education-service district school lists (public)

LinkedIn: "head of school", "ICT coordinator"

SPONSORS

CSR pages and annual reports of listed companies

Foundation and grant directories

Development-partner education programmes

LinkedIn: "CSR manager", "program officer, education"

Global by design: the same sources exist in most countries. We start with Cape Coast and one contrasting city. Screenshots of each source are added as the lists are built.

TARGETS · PROFILE 1 OF 3

THE PROGRAM OWNER.

TITLES	Founder, director or coordinator of an after-school, holiday, club or STEM program
ORGANISATION	1–20 staff; runs recurring sessions for ages about 9–12
MINDSET	Loves hands-on learning; worn out by re-planning every session; needs proof for parents
PROBLEM WE DESCRIBE	Great sessions depend on one star facilitator
BUYS	A program or site fee; parents may fund it through fees

THE SCHOOL LEADER.

TITLES	Head teacher, deputy head, ICT or STEM coordinator
ORGANISATION	Private, mission or international school
MINDSET	Wants pupils to learn by doing, not just from the board; wants parents to see progress
PROBLEM WE DESCRIBE	Few chances to build and test; no record of what pupils can do
BUYS	A per-classroom licence, billed per term

TARGETS · PROFILE 3 OF 3

THE SPONSOR.

TITLES	CSR manager, foundation program officer, partnerships lead
ORGANISATION	Company, foundation or development partner with an education focus
MINDSET	Wants measurable, reportable impact, not one-off donations
PROBLEM WE DESCRIBE	Hard to show what children gained
BUYS	Sponsored access for public schools, with reporting

03

THE LISTS

Fifty real organisations per profile, each with a source. No bought lists.

LEAD LIST · PROFILE 1 · PART 1 OF 3

66 ORGANISATIONS

04

THE WORDS

Three messages, one per profile. Short, specific, one request.

MESSAGE 1 · PROGRAM OWNER · EMAIL

COMPELLING CONTENT.

SUBJECT

Repeat your best session, without re-planning it

Hi [first name],

I run Algo Peers in Cape Coast. For five years we have taught hands-on computing to 1,000+ children, and the hardest part was always the same: a great session depends on one great facilitator.

We are now building Next Billion Children: ready-to-run Learning Worlds with materials, a facilitator guide and a shared AI helper, plus a short summary of what each child could do.

Would you be open to a 20-minute call next week to see if a pilot fits [program name]?

Sam Quansah · Founder, Algo Peers · samquansah@gse.harvard.edu

1. The subject line is about their result, not our product
2. Why trust us, in one line: five years, 1,000+ children
3. Their problem comes before our product
4. One small request: 20 minutes

MESSAGE 2 · SCHOOL LEADER · LINKEDIN

COMPELLING CONTENT.

SUBJECT

When pupils build it, they understand it

Hi [first name], most pupils learn science and computing from the board. Few get to build something, watch it fail and try again.

NBC gives your teachers ready-to-run Learning Worlds: hands-on challenges where pupils build and test real things, with a shared AI that helps the teacher prepare. Each pupil gets a short record of what they demonstrated, for parents.

We are opening a few pilot classrooms this term. Could I send you a one-page outline?

Sam, Algo Peers

1. Opens with a problem they see daily
2. Hands-on learning, with the teacher supported
3. Evidence framed for their audience: parents
4. An easy yes: a one-page outline

MESSAGE 3 · SPONSOR · EMAIL

COMPELLING CONTENT.

SUBJECT

Hands-on learning you can report on

Dear [first name],

Algo Peers has worked with 31 public schools and 11,000+ learners in Cape Coast. Most of their children never get to build and test real things.

NBC delivers hands-on Learning Worlds in public schools, funded by sponsors, with a clear summary of what children demonstrated, and no children's data ever sold or shared.

Could we share a short sponsorship brief and find 20 minutes to talk?

Sam Quansah · Founder, Algo Peers

1. Our reach comes first
2. The gap their CSR budget is for
3. A result they can report, and a promise about children's data
4. Brief first, then a short call

FOUR TOUCHES · FOURTEEN DAYS

SEQUENCE.

DAY 0

EMAIL OR LINKEDIN

The core message

DAY 3

SAME CHANNEL

A one-line reminder with something new: a 30-second Farm World video

DAY 7

OTHER CHANNEL

Connect on LinkedIn, or email if we started there; offer the one-page brief

DAY 14

EMAIL

A polite close: "Shall I close the loop?" Opt-out honoured

A reply at any step stops the sequence and moves the lead to "conversation". WhatsApp only after someone gives us their number. Sends go out Tuesday to Thursday mornings, local time.

05

THE RESULTS

What we sent, who answered, and what we learned.

25 MESSAGES · SENT ONE BY ONE

School leaders	—	—	—	—	—	—	10% REPLY
Sponsors	—	—	—	—	—	—	8% REPLY
Total	—	—	—	—	—	—	10 CALLS · 3 OFFERS

Updated on GitHub as replies come in, with the final count on Tue 20 Oct. If a profile misses its target, we rewrite that message, not the target.

06

THE PLAYBOOK

How we did it, and how we use it next.

TACTICAL PLAYBOOK · STEPS

TEN STEPS.

1. Set goals and reply-rate targets before sending anything.
2. Chose three profiles from our persona work: program owners, school leaders, sponsors.
3. Mapped the watering holes for each profile, global first, then local.
4. Built a lead-list template and sourcing rules; started 50+ leads per profile.
5. Wrote one message per profile, annotated for problem, proof and ask.
6. Designed a four-touch, fourteen-day sequence across email and LinkedIn.
7. Set up CRM stages: sent, replied, call, pilot offer.
8. Send 25 first messages, then review and revise the weakest message.
9. Log every reply; book calls; record pilot offers.
10. Compare each profile with its target and choose who to focus on next.

WHY IT MATTERS.

HOW IT RELATES TO EARLIER TACTICS

Market research showed us who buys. Visual assets gave us a brand people trust. Persona ads tested who responds. Outreach now turns those personas into real conversations.

HOW IT RELATES TO OUR BUSINESS

Our first revenue is a program or site fee from operators and schools, and sponsored access from partners. Each needs a direct conversation.

HOW WE WILL USE IT AGAIN

The same lists, messages and sequence work for each new city and country. Only the names and the local proof change.

HOW IT ADVANCES THE BUSINESS

Calls lead to pilot offers. Pilot offers test price and renewal, our biggest question, and give investors evidence for our pre-seed round.

07

MEANWHILE

What else moved this week.

VENTURE UPDATE · PRODUCT

IN PROGRESS

WEBSITE AND PROTOTYPES IN PROGRESS.

- Our website is in development.
- Three Learning Worlds (Farm, Ramp, Plant), a task format and classroom prototypes are at prototype stage.
- NBC builds Physical AI for learning: programmable physical environments, shared AI and evidence of what children can do.

VENTURE UPDATE · HARVARD

IN PROGRESS

APPLYING TO VIP.

- Applying to the Harvard Innovation Labs Venture Incubation Program, as an i-lab member at Propel stage.
- The application focuses on our three riskiest assumptions: price, whether other facilitators can run it, and whether learning holds on new tasks.

VENTURE UPDATE · FUNDING

PREPARING

RAISING WITHOUT A BROKER.

- Preparing a pre-seed round to fund pilots, IP protection and two hires.
- We turned down a paid fundraising firm. We will raise through our own network and i-lab.

NEXT BILLION CHILDREN

LEARNING INFRASTRUCTURE FOR THE NEXT BILLION CHILDREN.
