Fall 2026 · Tactic week Wed 14 – Tue 20 Oct 2026

SALES · EARLY CUSTOMER DEMAND GENERATION · TEAM NBC

VENTURE INTRO

ANSWERS ARE CHEAP. CAPABILITY ISN'T.

Elevator pitch: Algo Peers is building Next Billion Children (NBC): learning infrastructure that makes physical learning and human capability legible. NBC is Physical AI where children build, experiment and develop capabilities with shared AI, and what they demonstrate becomes evidence. It starts from five years of Algo Peers practice in Cape Coast, Ghana.

PHYSICAL LEARNING

Learning Worlds from programmable materials: build, predict, test, revise.

EVIDENCE

What a child demonstrated, under what conditions and with what help.

SHARED AI

One AI per learning centre supports the facilitator. No device per child.

EXPERIMENT OUTLINE

PART 1: WHAT DO YOU WANT TO GET OUT OF THIS TACTIC?

Ten first calls and three pilot offers with a stated price, from people who could buy, host or fund an NBC pilot; and a repeatable outbound motion any teammate can run in a new city or country.

PART 2: WHAT IS YOUR HYPOTHESIS FOR THIS TACTIC?

H1 · Program owners: Operators of hands-on programmes reply at 15% or more when the message names their real problem: repeating a great session without a star facilitator.
H2 · School leaders: Heads and STEM coordinators at private and mission schools reply at 10% or more to a pilot seat plus an evidence summary.
H3 · Sponsors: CSR and foundation officers reply at 8% or more to a sponsored-access pilot with clear reporting.

PART 3: WHAT EXPERIMENT DO YOU WANT TO RUN FOR THIS TACTIC?

Three profiles, 50+ sourced leads each. One message per profile and a four-touch, 14-day sequence on email and LinkedIn. Send 25 first messages, revise the weakest, then the rest. Log every touch in our CRM; compare reply rates and calls booked by profile. Adults only, no bought lists, every opt-out honoured.

COLLECTED DURING TACTIC WEEK · REAL DATA ONLY

TARGETS - COMPANIES (B2B)

PROGRAM OWNERS

Code Club and micro:bit community maps

Africa Code Week and similar partner lists

Makerspace and STEM-club directories

LinkedIn: "STEM program director", "after-school founder"

SCHOOLS

National private-school council member lists

Mission and faith school networks

Education-service district school lists (public)

LinkedIn: "head of school", "ICT coordinator"

SPONSORS

CSR pages and annual reports of listed companies

Foundation and grant directories

Development-partner education programmes

LinkedIn: "CSR manager", "program officer, education"

The watering holes where we build our company lists. Screenshots of each directory are added as the lists are built during tactic week.

TARGETS - PROFILES

PROFILE 1

THE PROGRAM OWNER

Titles: Founder, director or coordinator of an after-school, holiday, club or STEM program

Organisation: 1–20 staff; runs recurring sessions for ages about 9–12

Mindset: Loves hands-on learning; worn out by re-planning every session; needs proof for parents

Pain we name: Great sessions depend on one star facilitator

Buys: A program or site fee; parents may fund it through fees

PROFILE 2

THE SCHOOL LEADER

Titles: Head teacher, deputy head, ICT or STEM coordinator

Organisation: Private, mission or international school

Mindset: Must teach computing with few working devices; wants parents to see progress

Pain we name: Equipment sits unused; no record of what pupils can do

Buys: A per-classroom licence, billed per term

PROFILE 3

THE SPONSOR

Titles: CSR manager, foundation program officer, partnerships lead

Organisation: Company, foundation or development partner with an education focus

Mindset: Wants measurable, reportable impact, not one-off donations

Pain we name: Hard to show what children gained

Buys: Sponsored access for public schools, with reporting

COMPELLING CONTENT · 1 OF 3

MESSAGE 1 · PROGRAM OWNER · EMAIL

SUBJECT

Repeat your best session, without re-planning it

Hi [first name],

I run Algo Peers in Cape Coast. For five years we have taught hands-on computing to 1,000+ children, and the hardest part was always the same: a great session depends on one great facilitator.

We are now building Next Billion Children: ready-to-run Learning Worlds with materials, a facilitator guide and a shared AI helper, plus a short summary of what each child could do.

Would you be open to a 20-minute call next week to see if a pilot fits [program name]?

Sam Quansah · Founder, Algo Peers · samquansah@gse.harvard.edu

WHY IT WORKS

1. Subject names their outcome, not our product
2. Credibility in one line: five years, 1,000+ children
3. Names their pain before our solution
4. One small ask with a time box

COMPELLING CONTENT · 2 OF 3

MESSAGE 2 · SCHOOL LEADER · LINKEDIN

SUBJECT

Your micro:bits, working every week

Hi [first name], many schools we work with have computing kits that sit unused because lessons take hours to prepare.

NBC turns kits like micro:bits into ready-to-teach Learning Worlds, with a short record of what each pupil demonstrated, for parents and inspectors.

We are opening a few pilot classrooms this term. Could I send you a one-page outline?

Sam, Algo Peers

WHY IT WORKS

1. Opens with a problem they see daily
2. Uses equipment they already own
3. Evidence framed for their audience: parents
4. Low-commitment ask: a one-page outline

COMPELLING CONTENT · 3 OF 3

MESSAGE 3 · SPONSOR · EMAIL

SUBJECT

Hands-on learning you can report on

Dear [first name],

Algo Peers has worked with 31 public schools and 11,000+ learners in Cape Coast. Most of their children never get to build and test real things.

NBC delivers hands-on Learning Worlds in public schools, funded by sponsors, with a clear summary of what children demonstrated, and no children's data ever sold or shared.

Could we share a short sponsorship brief and find 20 minutes to talk?

Sam Quansah · Founder, Algo Peers

WHY IT WORKS

1. Scale and access up front
2. The gap their CSR goals target
3. Reportable outcome plus a data promise
4. Brief first, then a short call

SEQUENCE

DAY 0

EMAIL OR LINKEDIN

The core message

DAY 3

SAME CHANNEL

A one-line nudge with a new detail: a 30-second clip of Farm World

DAY 7

OTHER CHANNEL

Connect on LinkedIn, or email if we started there; offer the one-page brief

DAY 14

EMAIL

A polite close: "Shall I close the loop?" Opt-out honoured

Cadence: four touches over 14 days. **Mediums:** email and LinkedIn; WhatsApp only after someone shares their number. A reply at any step stops the sequence. Sends go out Tuesday to Thursday mornings, local time.

0 OF 25 SENT · STARTS WED 14 OCT

MESSAGES

1	2	3	4	5
6	7	8	9	10
11	12	13	14	15
16	17	18	19	20
21	22	23	24	25

- Each tile becomes an annotated screenshot of a message we actually sent.
- Split: 10 program owners, 8 school leaders, 7 sponsors.
- Replies are marked on each screenshot.

RESULTS

PROFILE	LEADS	SENT	REPLIES	REPLY RATE	CALLS BOOKED	PILOT OFFERS	PASS LINE
Program owners	—	—	—	—	—	—	15% REPLY
School leaders	—	—	—	—	—	—	10% REPLY
Sponsors	—	—	—	—	—	—	8% REPLY
Total	—	—	—	—	—	—	10 CALLS · 3 OFFERS

Summary: written on Tue 20 Oct from the CRM, for each target profile.

TACTICAL PLAYBOOK

WHAT STEPS DID YOU TAKE TO EXECUTE THIS TACTIC?

1. Set goals and pass lines before sending anything.
2. Chose three profiles from our persona work: program owners, school leaders, sponsors.
3. Mapped the watering holes for each profile, global first, then local.
4. Built a lead-list template and sourcing rules; started 50+ leads per profile.
5. Wrote one message per profile, annotated for problem, proof and ask.
6. Designed a four-touch, fourteen-day sequence across email and LinkedIn.
7. Set up CRM stages: sent, replied, call, pilot offer.
8. Send 25 first messages, then review and revise the weakest message.
9. Log every reply; book calls; record pilot offers.
10. Compare profiles against pass lines and choose who to focus on next.

HOW DOES THIS TACTIC RELATE TO PREVIOUS TACTICS?

Market research named the buyer; visual assets gave us a brand people trust; persona ads tested who responds. Outbound now turns those personas into named conversations.

HOW CAN YOU LEVERAGE THIS TACTIC IN THE FUTURE?

The same lists, messages and sequence work for each new city and country. Only the names and the local proof change.

HOW DOES THIS TACTIC RELATE TO YOUR BUSINESS?

Our first revenue is a program or site fee from operators and schools, and sponsored access from partners. Each needs a direct conversation.

HOW CAN THIS TACTIC ADVANCE YOUR BUSINESS?

Calls become pilot offers; pilot offers test price and renewal, our biggest uncertainty, and give us evidence for the pre-seed raise.

BUILT

VENTURE UPDATES

WEBSITE LIVE. PROTOTYPES NEXT.

- Our website is built and live.
- Three Learning Worlds (Farm, Ramp, Plant), a task format and classroom prototypes are at prototype stage.
- Positioned as Physical AI: physical learning, evidence and shared AI in one learning infrastructure.

IN PROGRESS

VENTURE UPDATES

APPLYING TO VIP.

- Applying to the Harvard Innovation Labs Venture Incubation Program, as an i-lab member at Propel stage.
- Application built around our three riskiest assumptions: price, facilitator handover and transfer.

PREPARING

VENTURE UPDATES

RAISING DIRECTLY.

- Preparing a pre-seed round to fund pilots, IP protection and two hires.
- Declined a paid capital-raising service: we raise directly through our network and i-lab.
