VENTURE INTRO

Elevator pitch: AI makes answers cheap, but the chance for children to investigate, build, get it wrong and try again is still costly. NBC builds **programmable physical learning environments where children build, experiment and develop capabilities with shared AI**, starting from five years of Algo Peers practice in Cape Coast, Ghana.

First customer

People who run after-school and holiday learning programmes for children aged about 9–12, starting in Cape Coast.

Offer

NBC Learning Worlds: reusable physical experiences, facilitator guidance and a short evidence summary.

Stage

Pre-seed. Algo Peers has reached 1,000+ children and has paying families; NBC pilots start this term.

EXPERIMENT OUTLINE

TESTS PLANNED · WEEK OF 7 OCT

Part 1: What do you want to get out of this tactic?

One consistent set of visual assets (logo, value graphic, website, social profiles and email signature) that lets a programme owner understand what NBC offers within a few seconds, and trust it enough to book a pilot conversation.

Part 2: What is your hypothesis for this tactic?

H1 A one-colour logo in the Algo Peers family reads as more credible than a new, standalone look, because it borrows five years of trust. **H2** A value graphic written for the buyer (the programme owner) explains the offer better than one written about children. **H3** A light website for several audiences, with an honest "where we are", earns more trust than a dark site built on one idea.

Part 3: What experiment do you want to run for this tactic?

Make two versions of each asset, revising v1 into v2 against our thesis audit and brand guide. Then run five-second tests of v1 against v2 with five programme owners from our interview list ("What does NBC do? Who is it for?"), and track pilot-conversation bookings from the website and signature.

LOGO DESIGN CONCEPTS

First concepts (1 of 2), 25 Sep 2026. Both start from one idea: *change one thing*. A field of identical pieces (a square with one rounded corner) where one piece has changed.

Concept 1 • Field mark. Nine pieces, one turned and lit in marigold. Bricolage Grotesque wordmark.

Next Billion Children

Concept 1 • Wordmark. The dot of the i becomes a lit piece.

Concept 2 • "Light up" lockup. Night ground, outlined pieces, one lit. Condensed poster type.

Sources: [logo files](#) · [full brand guide \(PDF\)](#)

LOGO DESIGN CONCEPTS

Simpler alternatives (2 of 2), 26 Sep 2026. Five options drawn from the same idea, each in night, paper and one-colour versions.

A • The piece (recommended): one lit piece and the name.

B • Before → **after:** the motion version.

C • Lit full stop: a one-line wordmark.

D • Lit O: the piece inside the word.

E • Three tries: two outlines, one lit.

We chose **A**: it reads at favicon size, works in one colour, and the piece can also be a node in our capability diagrams.

Sources: [logo files](#) · [full brand guide \(PDF\)](#)

ASSETS

Team NBC (Next Billion Children)

LOGO DESIGN V2

v2 lockup, 26 Sep 2026 (ink on white)

White on a brand colour

Symbol (avatar, favicon)

What changed from concept A

- 1 **Kept the piece** from concept A as the symbol.
- 2 **Type:** condensed poster type → **Unbounded** expanded capitals, matching the Algo Peers family; it also covers the Ghanaian letters ε , $\circ$ and η .
- 3 **Colour:** a yellow light on night → **one colour only:** ink on white, white on brand colours.
- 4 **Dropped the "light up" grid;** lights now mark tries inside products, not the logo.
- 5 **Tested "a venture by Algo Peers"** under the logo; not chosen. Algo Peers is named in text instead.

GRAPHIC, ANIMATION, OR VIDEO V1

AI MAKES ANSWERS CHEAP. TRYING AGAIN SHOULDN'T BE.

**01
INVESTIGATE**
Ask what will happen.

**02
BUILD**
Set up the ramp, the circuit,
the garden.

**03
GET IT
WRONG**
The car stops short. Good.

**04
TRY AGAIN**
Change one thing. Test it.

Learning Worlds give children the chance to investigate, build, get it wrong and try again, with shared AI.

NBC · Value graphic v1 · 5 Oct 2026

Value graphic v1, 5 Oct 2026 (1920 × 1080).

Sources: [value graphic v1](#) · [full brand guide \(PDF\)](#)

What it says

The value of NBC for a child: a learning loop of investigate, build, get it wrong and try again, under the line "AI makes answers cheap. Trying again shouldn't be."

What our review found

- It speaks to children, but our buyer is the programme owner.
- It doesn't say what the buyer gets or can show.
- Colours are decorative, not the brand's colour jobs.
- No honest status line.

GRAPHIC, ANIMATION, OR VIDEO V2

What changed from v1

- 1 Audience:** written for the programme owner, our first buyer.
- 2 What you get:** the four parts of the offer, named.
- 3 What you can show** parents, funders and your team: the buyer’s outcome.
- 4 Colour jobs:** yellow experience, orange action, blue intelligence, violet evidence, green capability.
- 5 Honest status line:** no learning results claimed yet.

FOR PEOPLE WHO RUN AFTER-SCHOOL AND HOLIDAY PROGRAMMES

HANDS-ON LEARNING, READY TO RUN. EVIDENCE YOU CAN SHOW.

WHAT YOU GET

- A Learning World kit**
Reusable, low-cost materials for up to six children per kit.
- A facilitator card**
Each 45-minute session on one printed card, so any trained facilitator can run it.
- An assistant that checks with you**
Prepares, translates and suggests the next step. You confirm every suggestion.
- A short evidence summary**
What each child tried, how much help they had, and whether it held in a new task.

WHAT CHILDREN DO

- Investigate**
Ask what will happen.
- Build**
Set up the ramp, the circuit, the garden.
- Get it wrong**
The car stops short. Good.
- Try again**
Change one thing. Test it.

WHAT YOU CAN SHOW

Parents: how their child took on a challenge, in their child's own words.

Funders: what children could do when the task changed.

Your team: sessions that run without the one expert.

No scores, rankings or comparisons between children.

Where we are: feasibility pilots building on five years of Algo Peers practice in Cape Coast, Ghana. No learning results are claimed yet.

- 1 **Night** → **light** theme, in the Algo Peers family colours and type.
- 2 **Headline:** "Change one thing" → "Learning infrastructure for the next billion children"; "Change one thing" moves to the first Learning World.
- 3 **New page, What we're building:** experience + intelligence + evidence → capability, with evidence gates.
- 4 **Learning Worlds:** three worlds for one capability, instead of six unrelated worlds.
- 5 **Facilitators and families:** assistant suggestions you confirm; a route for families to correct a record.
- 6 **One orange button,** "Book a pilot conversation", and a "Where we are" status on the home page.

TACTICAL PLAYBOOK

How does this tactic relate to your business?

Our buyers decide in seconds whether NBC looks credible and relevant. These assets carry the offer and the Algo Peers track record into every first impression.

How does this tactic relate to previous tactics?

Market research named our first buyer, the programme owner, and the problems we test. v2 of each asset speaks to that buyer and uses the interview language.

What steps did you take to execute this tactic?

1. Set message levels and colour jobs in the brand strategy.
2. Drew two first logo concepts, then five simpler alternatives; chose the piece.
3. Rebuilt the logo in the Algo Peers family (v2), in one colour.
4. Made value graphic v1, reviewed it against our buyer, then made v2.
5. Built website v1, audited it against the thesis, then built v2.
6. Designed the social profile kit and wrote the bios.
7. Built an email-safe signature with the founder photo.
8. Published every asset and the full brand guide on GitHub.

Sources: [full brand guide \(PDF\)](#) · [brand strategy](#) · [deadlines](#)

How can this tactic advance your business?

Every outreach message, pilot offer and investor email now carries the same look, supporting 10 offers by Tue 20 Oct.

How can you leverage this tactic in the future?

The kit scales to new Learning Worlds and countries: one colour per job, the piece as a symbol, and the same templates.

VENTURE UPDATES

Venture update: market research published; interviews under way

IN PROGRESS

- Published the [market research playbook](#) (34 slides), with 10 watering holes, 20 messages and 10 scheduled interviews.
- Interviews were scheduled for Wed 30 Sep – Tue 6 Oct. Results go into the [interview tracker](#) and insights grid as each one is completed.
- Next decision, Wed 7 Oct: which problem and which buyer.

Sources: [interview tracker](#) · [deadlines](#) · [full brand guide \(PDF\)](#)

VENTURE UPDATES

Venture update: privacy and intellectual property

- Reviewed both public repositories for personal data, children's data and invention details. No personal or children's data was found.
- Moved prototype demo materials out of the public investor repository until we have patent advice.
- Added a rule to our working notes: public materials describe inventions at vision level only.
- Next: a conversation with a patent attorney or university clinic.

Sources: [repository rules](#) · [full brand guide \(PDF\)](#)

VENTURE UPDATES

APPLIED · DECISION PENDING

Venture update: TNT accelerator

- Applied to the **TNT accelerator** after the TNT build night: \$200,000 pre-seed investment for 2.5% equity.
- **Status:** decision pending.

Venture update: brand kit published

- The [full brand guide](#), logos, colour tokens, value graphic, social kit and email signature are now in our public repository.

Sources: [investor repository](#) · [brand folder](#) · [full brand guide \(PDF\)](#)

VENTURE UPDATES

Venture update: the next four weeks

WEEK	DATES	WORK	DEADLINE / DECISION
2	30 Sep – 6 Oct	v2 messages; 10 interviews; visual assets	Wed 7 Oct: which problem and buyer
3	7 – 13 Oct	Task review; costed pilot offer; five-second asset tests	One offer, one learning claim
4	14 – 20 Oct	Usability sessions; offers to 10 buyers	Tue 20 Oct: 10 offers out
5	21 – 27 Oct	Outside facilitators deliver	Kit, supported programme or redesign

Weeks run Wednesday to Tuesday.
