LEARNING INFRASTRUCTURE FOR THE NEXT BILLION CHILDREN

Elevator pitch: AI makes answers cheap, but the chance for children to investigate, build, get it wrong and try again is still costly. NBC builds **programmable physical learning environments where children build, experiment and develop capabilities with shared AI**, starting from five years of Algo Peers practice in Cape Coast, Ghana.

First customer

People who run after-school and holiday learning programmes for children aged about 9–12, starting in Cape Coast.

Offer

NBC Learning Worlds: reusable physical experiences, facilitator guidance and a short evidence summary.

Stage

Pre-traction. Algo Peers has 1,000+ children reached and paying families; NBC pilots start this term.

WHAT WE WANT TO LEARN THIS WEEK

Part 1 · What we want

Find **one recurring learning problem** painful enough for a programme owner to change a programme or pay for support, and identify **who decides and pays**.

Part 2 · Hypotheses

H1 Programme owners can't easily tell whether a child can use an idea in a new task.

H2 Hands-on sessions stop when the one skilled facilitator is absent.

H3 Programme owners would pay for reusable experiences and support that cut preparation.

H4 Parents value seeing how their child tackles a challenge, not scores.

Part 3 · Experiment

Find 10+ watering holes; send 10 first messages, then 10 revised ones; run **12–16 problem interviews** across programme owners, facilitators, parents and researchers; code them in an insights grid. **No product pitch** until the problem is explored.

Balance rules: at least half of programme owner interviews not connected to Algo Peers; constrained and tech-rich settings both represented; adults only, with verbal consent.

PROBLEM INTERVIEW SCRIPT (PMR V1), QUESTIONS 1-4

#	QUESTION	WHAT IT TESTS
1	Walk me through the last practical learning session you ran.	Context; the real routine
2	Tell me about the last time a child finished an activity but you weren't sure what they understood.	H1 · P1
3	What did you do next? What did that take?	Workaround and its cost
4	Show me how you record progress or explain it to a family.	H4 · P4

Rules: open with consent (voluntary, adults only, notes taken). Real, recent examples before any mention of NBC. Record refusals and reasons. **A compliment is not a buying signal.**

PROBLEM INTERVIEW SCRIPT (PMR V1), QUESTIONS 5-7

#	QUESTION	WHAT IT TESTS
5	Describe a time a learner used an idea successfully in a different activity.	What counts as transfer
6	What makes practical sessions hard to repeat with another facilitator?	H2 · P2 · P3
7	What have you paid for to improve this programme? How was that decided?	H3 · P5 · past spend

PROBLEM INTERVIEW SCRIPT (PMR V1), QUESTIONS 8-10

#	QUESTION	WHAT IT TESTS
8	Which tools or routines work well enough that you'd keep them?	Existing alternatives
9	(Only after the problem) Here is a scoped pilot. What would have to happen for it to fit?	Offer response
10	What is the actual process for approving money, delivery and a start date?	Who decides and pays

Logged after each call: role · setting · connected or new · recent problem · workaround · consequence · frequency · who buys · budget process · existing spend · offer response · next step.

FIRST OUTREACH MESSAGES

P1 · Email · GRAF / club owner

SCHEDULED · MON 28 SEP

To: Ghana Robotics Academy Foundation (website contact) · [open ↗](#)
Subject: Robofest congratulations, and a question about your clubs · 73 words

Dear [Name], congratulations to the Ghana Robotics Academy Foundation and Mikrobot Academy on the 2026 Robofest Junior title. I'm Sam Quansah, founder of Algo Peers in Cape Coast. I'm speaking with people who run recurring robotics or STEM clubs about how you tell whether a child can use what they learned when a new challenge looks different. Could you introduce me to two or three club coaches or owners for a 20-minute conversation?

P2 · Email · Ghana Code Club

SCHEDULED · MON 28 SEP

To: Ghana Code Club team · [open ↗](#)
Subject: A research question on keeping hands-on sessions going · 65 words

Dear Ghana Code Club team, I'm Sam Quansah, founder of Algo Peers in Cape Coast. I saw your launch of the "Coding & AI Without Computers" kits. Our programmes overlap, so to be open: this is research, not a sales pitch. I'm learning how facilitators keep hands-on sessions going when a trained facilitator moves on. Would someone who supports your facilitators talk for 20 minutes?

FIRST OUTREACH MESSAGES

P3 · Formal letter (email) · Ghana Library Authority

SCHEDULED · MON 28 SEP

To: Ghana Library Authority, Programme Office · [open ↗](#)
Subject: Request for a 20-minute conversation with a librarian · 61 words

Dear [Programme Office], I'm Sam Quansah, founder of Algo Peers in Cape Coast. I read about the Authority's children's coding bootcamp and librarian training. With your permission, I'd like a 20-minute conversation with a librarian who has run these sessions, about what helps them continue with limited devices and what children can still do weeks later. I'd share a short summary.

P4 · Facebook group post · Participatory Library group

SCHEDULED · TUE 29 SEP

Where: MakerSpaces and the Participatory Library · [open ↗](#)
Posted only after admin approval (requested Mon 28 Sep) · 63 words

Hello everyone. With the admins' permission: I'm Sam Quansah, founder of Algo Peers and a Harvard GSE student (my own research, not a Harvard project). Can you recall a recent maker session where a child finished a project, perhaps with a tutorial or AI helping, and you weren't sure what they could do on their own next time? A 15–20-minute call would help.

FIRST OUTREACH MESSAGES

P5 · Email · Learning-sciences researcher

SCHEDULED · MON 28 SEP

To: a learning-sciences researcher (ISLS) · [open ↗](#)
Subject: 20 minutes of critique on a transfer-task study? · 58 words

Dear Dr [Name], I'm Sam Quansah, founder of Algo Peers and a Harvard GSE student, writing independently. I read your work on [topic]. We're planning a small feasibility study of whether children aged 9–12 can use the change-one-thing idea in an unfamiliar task. Before we fix the sample and measures, could I ask you 20 minutes of questions?

R1 · Community post · Facilitator community

SCHEDULED · TUE 29 SEP

Where: micro:bit Champions community · [open ↗](#)
Posted only with moderator permission · 61 words

Hello. I'm Sam Quansah from Algo Peers, which runs hands-on learning for children in Ghana. With the moderators' permission, I'm asking facilitators who run sessions for 9–12-year-olds about a recent session: what happened, what got in the way, and how you judged what each child could do afterwards. A 15-minute call or a voice note would help. There's nothing to buy.

FIRST OUTREACH MESSAGES

Direct message to a meetup organiser · 60 words

Hi [Name], I'm Sam Quansah from Algo Peers in Ghana, where we run children's physical-computing sessions. I'm researching how practitioners notice whether a child has understood an idea, like testing one change at a time, rather than just finishing the build. Could you describe the last time you weren't sure? A reply, voice note or 15-minute call would be welcome.

FIRST OUTREACH MESSAGES

R4 · Reddit post · Parent community

SCHEDULED · TUE 29 SEP

Where: r/homeschool · [open ↗](#)

Posted only after moderator approval · 56 words

Hello. I'm Sam Quansah, founder of Algo Peers. With the moderators' permission, I'd like to hear from parents of 9–12-year-olds about a recent time your child made or investigated something, and how you could tell what they understood, especially if an app or AI helped. I'm not contacting children. A 15-minute conversation with you would help.

R5 · Email · Assessment researcher

SCHEDULED · MON 28 SEP

To: an assessment researcher (ISLS) · [open ↗](#)

Subject: How would you test transfer, cheaply? · 62 words

Dear Dr [Name], I'm Sam Quansah, founder of Algo Peers and a Harvard GSE student, writing independently. Your work on [topic] fits a question we're working on: how to tell, validly and cheaply, whether a child can use an idea in a task that looks different weeks later. Could I ask you a few questions in 20 minutes? I'd welcome your critique.

SEND SCHEDULE AND MEASURES

Tactic week: Wed 23 – Tue 29 Sep

Wed 23 – Sun 27: research, script and messages prepared.

Mon 28 Sep: P1, P2, P3, P5, R5 emails; admin and moderator requests.

Tue 29 Sep: P4, R1–R4 posts and messages.

In person: Cape Coast canvassing, Mon 28 – Tue 29 Sep.

How we measure v1

For each message: sent, replies within 5 days, qualified, interviews booked. A screenshot of each sent message goes into the [outreach log](#) the same day.

REFINED OUTREACH MESSAGES

P1 · Email · GRAF / club owner

SCHEDULED · WED 30 SEP

To: Ghana Robotics Academy Foundation (website contact) · [open ↗](#)
Subject: Robofest congratulations, and a question about your clubs · 59 words

Dear [Name], congratulations on the 2026 Robofest Junior title. Can you describe the last time a club member built something well but struggled when the challenge changed? I'm Sam Quansah, founder of Algo Peers in Cape Coast, researching exactly that. There's nothing to sell. Could you point me to two coaches for a 15-minute call or a voice note?

P2 · Email · Ghana Code Club

SCHEDULED · WED 30 SEP

To: Ghana Code Club team · [open ↗](#)
Subject: A research question on keeping hands-on sessions going · 50 words

Dear Ghana Code Club team, a research question, not a pitch: when a trained facilitator moves on, what keeps a centre's hands-on sessions going? I'm Sam Quansah (Algo Peers, Cape Coast). A 15-minute call or a short voice note from someone who supports your facilitators would help us a lot.

REFINED OUTREACH MESSAGES

P3 · Formal letter (email) · Ghana Library Authority

SCHEDULED · THU 1 OCT

To: Ghana Library Authority, Programme Office · [open ↗](#)
Subject: Request for a 20-minute conversation with a librarian · 50 words

Dear [Programme Office], with your permission I'd like to learn from one librarian who ran the children's coding sessions: what helped the sessions continue with few devices, and what children could still do weeks later? 15 minutes, voluntary, with a summary shared back. Sam Quansah, founder, Algo Peers (Cape Coast).

P4 · Facebook group post · Participatory Library group

SCHEDULED · THU 1 OCT

The tool we use

One tracker on GitHub holds the outreach log, the interview schedule, the notes and the insights grid: [interview tracker](#). The questions are in the [PMR v1 script](#). Screenshots of notes are added here after each interview.

WHAT SECONDARY RESEARCH ALREADY SHOWS

SECONDARY · SOURCED

The market is large and the need is real

After-school programmes are a **\$29–53B** global market (2025 estimates). **70%** of 10-year-olds in low- and middle-income countries can't read a simple text ([World Bank](#)). AI tutoring gave **~0.37 SD** maths gains in Ghana ([Rori trial](#)): answers are getting cheap, so NBC must win on hands-on capability, not tutoring.

SECONDARY · SOURCED

Where our buyers and users are

Ghana networks are organisation-led: [Ghana Code Club](#) (7,000 teachers, 22 centres), [GRAF](#), [15 libraries](#). So **introductions beat posts**. Cape Coast programme owners have **no online group**, so we canvass in person. [micro:bit Champions](#) (382 educators, 51 countries) give contrast sites.

QUESTIONS TO TEST, AND WHEN REAL FINDINGS ARRIVE

REHEARSAL · NOT EVIDENCE

Questions to test

A rehearsal of our script with 10 simulated personas suggested: sessions stop when "the one person" is absent; buyers want peer proof and written terms more than a lower price; parents judge on exam marks. **We treat these only as questions.**

SCHEDULED

Primary findings

The consolidated findings fill in as the 10 interviews happen (Wed 30 Sep – Tue 6 Oct) and are due **Wed 7 Oct**, reported by segment with counts and denominators: [tracker and findings](#).

PARTICIPANTS 1-4: FIVE PROBLEMS TO RATE

PARTICIPANT	SOURCE	INTERVIEW	P1 CAN'T TELL IF SKILL TRANSFERS	P2 STOPS WITHOUT KEY FACILITATOR	P3 PREP TIME TOO HIGH	P4 HARD TO SHOW FAMILIES PROGRESS	P5 NO BUDGET ROUTE

Researcher	ISLS member	Tue 6 Oct	.	.	.	.	.

Each cell is rated 0–3 straight after the interview. Rules for reading the grid are on the next slides.

HOW WE WILL READ THE GRID

Rating scale

0 not raised
1 raised when asked
2 raised with an example
3 raised unprompted, with a recent example

Confirmed problem

Set in advance: **6 or more of 10**
rate it 2 or higher, including **at least 3 of 5 buyers.**

Callouts after 6 Oct

How many of 10 rate each problem 2+, by segment (buyers, users, hosts, researchers). Never averaged across segments.

HOW THIS TACTIC MOVES NBC

How does it relate to our business?

It decides our first customer and problem. The v5 plan depends on one recurring problem and one buyer, confirmed by people outside our network.

What steps did we take?

- 1 · Defined segments and qualification rules.
- 2 · Mapped 20 watering holes from sources; picked 10.
- 3 · Wrote the PMR script.
- 4 · Drafted 10 messages, then 10 revisions.
- 5 · Built the tracker and insights grid.
- 6 · Rehearsed the script with simulated personas.
- 7 · Scheduled v1 (28–29 Sep), v2 and 10 interviews (30 Sep – 6 Oct).

PAST, FUTURE AND IMPACT

How does it relate to previous tactics?

Builds on our segmentation, personas and the 24-step business plan. Simulated studies shaped the questions; real PMR now tests them.

How can we leverage it in future?

The same watering holes recruit pilot sites, outside facilitators and a contrasting research site.

How can it advance NBC?

It feeds our first pass line: offers to 10 qualified buyers by Tue 20 Oct, and 3 paid commitments by Tue 10 Nov.

LEARNING WORLDS ARE DESIGNED EXPERIENCES

1 · Belong

A story and a real problem from the child's world.

2 · Investigate

Build with micro:bit, sensors and everyday materials; ask AI good questions.

3 · Understand

Predict, test, explain, revise.

4 · Apply

Build for someone real; show the skill in a new situation.

Example already run by Algo Peers, Farm World: 51 learners aged 7–15 from 34 communities (53% girls) built 7 working prototypes for food security. Participation and outputs, not a measured learning effect.

MARKET SIZE AND FIVE-YEAR SCENARIOS

\$29–53B

TAM

Global after-school programmes, 2025 industry estimates. 1.4B students enrolled worldwide (UNESCO, 2024).

~\$99M

SAM

Ghana's ~27,400 primary and junior high schools × \$3,600 a site a year.

\$3.2M

SOM, year 5

800 sites, central scenario. Low \$0.36M; high \$11.3M.

Projections from stated assumptions, not forecasts; rebuilt from pilot data. Details: [economics and scenarios](#) · [benchmarks](#).

EIGHT WEEKS TO A CLEAR DECISION

WEEK	DATES	WORK	DEADLINE / DECISION
1	23 – 29 Sep	Research, script and messages; send all 10 v1 messages; canvass Cape Coast	Tue 29 Sep: v1 outreach complete
2	30 Sep – 6 Oct	v2 messages; 10 interviews; one follow-up	Wed 7 Oct: which learning problem and buyer
3	7 – 13 Oct	12–16 conversations in total; task review; costed pilot offer	One offer and one bounded learning claim
4	14 – 20 Oct	Task usability sessions; baseline; offers to 10 qualified buyers	Fix tasks; 10 offers out

Weeks run Wednesday to Tuesday. Each Tuesday: submit the tactic deck (PDF) and update the decision record.

THE PASS LINE AND CLOSEOUT

WEEK	DATES	WORK	DEADLINE / DECISION
5	21 – 27 Oct	Outside facilitators deliver; log prep, help and explanations	Kit, supported programme or redesign
6	28 Oct – 3 Nov	Delayed, unfamiliar task, scored blind	Is richer capture worth it?
7	4 – 10 Nov	Repeat delivery; payments, decisions and costs	Tue 10 Nov pass line: 3 of 10 buyers pay
8	11 – 17 Nov	Contrasting site, if access is ready	What travels; closeout Fri 20 Nov

Weeks run Wednesday to Tuesday. Each Tuesday: submit the tactic deck (PDF) and update the decision record.
