MARKET RESEARCH

Team NBC (Next Billion Children), built by Algo Peers

Sam Quansah (founder) · Vera Aninakwah · Nana Adwoa Nsiah · Deborah Quansah

Fall 2026 · Week of 28 September 2026 · Primary and secondary market research playbook

LEARNING INFRASTRUCTURE FOR THE NEXT BILLION CHILDREN

Elevator pitch: AI makes answers cheap, but the chance for children to investigate, build, get it wrong and try again is still costly. NBC builds **programmable physical learning environments where children build, experiment and develop capabilities with shared AI**, starting from five years of Algo Peers practice in Cape Coast, Ghana.

First customer

People who run after-school and holiday learning programmes for children aged about 9–12, starting in Cape Coast.

Offer

NBC Learning Worlds: reusable physical experiences, facilitator guidance and a short evidence summary.

Stage

Pre-traction. Algo Peers has 1,000+ children reached and paying families; NBC pilots start this term.

WHAT WE WANT TO LEARN THIS WEEK

Part 1 · What we want

Find **one recurring learning problem** painful enough for a programme owner to change a programme or pay for support, and identify **who decides and pays**.

Part 2 · Hypotheses

H1 Programme owners can't easily tell whether a child can use an idea in a new task.

H2 Hands-on sessions stop when the one skilled facilitator is absent.

H3 Programme owners would pay for reusable experiences and support that cut preparation.

H4 Parents value seeing how their child tackles a challenge, not scores.

Part 3 · Experiment

Find 10+ watering holes; send 10 first messages, then 10 revised ones; run **12–16 problem interviews** across programme owners, facilitators, parents and researchers; code them in an insights grid. **No product pitch** until the problem is explored.

Balance rules: at least half of programme owner interviews not connected to Algo Peers; constrained and tech-rich settings both represented; adults only, with verbal consent.

PROBLEM INTERVIEW SCRIPT (PMR V1)

1. Walk me through the last practical learning session you ran.
2. Tell me about the last time a child finished an activity but you weren't sure what they understood.
3. What did you do next? What did that take?
4. Show me how you record progress or explain it to a family.
5. Describe a time a learner used an idea successfully in a different activity.
6. What makes practical sessions hard to repeat with another facilitator?
7. What have you paid for to improve this programme? How was that decided?
8. Which tools or routines work well enough that you'd keep them?
9. (After the problem) Here is a scoped pilot. What would have to happen for it to fit?
10. What is the actual process for approving money, delivery and a start date?

Rules

Open with consent: voluntary, adults only, notes taken.
Capture real examples before mentioning NBC. Record refusals and reasons. **A compliment is not a buying signal.**

Fields logged

Role · setting · warm or new · recent problem · workaround · consequence · frequency · buyer · budget process · existing spend · offer response · next concrete step.

WHERE OUR PMR SUBJECTS GATHER

G1 · TEACHER AND MENTOR NETWORK

Ghana Code Club

7,000 teachers · 22 centres

Programme reach, self-reported

Ghanaian teachers running children's coding clubs: our users and programme owners.

ghanacodeclub.org

G2 · ORGANISATION AND CLUB COACHES

Ghana Robotics Academy Foundation

Robofest clubs

Member count not public

Club owners and coaches decide what to run and pay for: our buyers.

FIRST OUTREACH MESSAGES

P1 · Email · GRAF / club owner

SCHEDULED · MON 28 SEP

To: Ghana Robotics Academy Foundation (website contact) · [open ↗](#)
Subject: Robofest congratulations, and a question about your clubs · 73 words

Dear [Name], congratulations to the Ghana Robotics Academy Foundation and Mikrobot Academy on the 2026 Robofest Junior title. I'm Sam Quansah, founder of Algo Peers in Cape Coast. I'm speaking with people who run recurring robotics or STEM clubs about how you tell whether a child can use what they learned when a new challenge looks different. Could you introduce me to two or three club coaches or owners for a 20-minute conversation?

P2 · Email · Ghana Code Club

SCHEDULED · MON 28 SEP

To: Ghana Code Club team · [open ↗](#)
Subject: A research question on keeping hands-on sessions going · 65 words

Dear Ghana Code Club team, I'm Sam Quansah, founder of Algo Peers in Cape Coast. I saw your launch of the "Coding & AI Without Computers" kits. Our programmes overlap, so to be open: this is research, not a sales pitch. I'm learning how facilitators keep hands-on sessions going when a trained facilitator moves on. Would someone who supports your facilitators talk for 20 minutes?

P3 · Formal letter (email) · Ghana Library Authority

SCHEDULED · TUE 29 SEP

To: Ghana Library Authority, Programme Office · [open ↗](#)
Subject: Request for a 20-minute conversation with a librarian · 61 words

Dear [Programme Office], I'm Sam Quansah, founder of Algo Peers in Cape Coast. I read about the Authority's children's coding bootcamp and librarian training. With your permission, I'd like a 20-minute conversation with a librarian who has run these sessions, about what helps them continue with limited devices and what children can still do weeks later. I'd share a short summary.

P4 · Facebook group post · Participatory Library group

SCHEDULED · WED 30 SEP

Where: MakerSpaces and the Participatory Library · [open ↗](#)
Posted only after admin approval (requested Tue 29 Sep) · 63 words

Hello everyone. With the admins' permission: I'm Sam Quansah, founder of Algo Peers and a Harvard GSE student (my own research, not a Harvard project). Can you recall a recent maker session where a child finished a project, perhaps with a tutorial or AI helping, and you weren't sure what they could do on their own next time? A 15–20-minute call would help.

FIRST OUTREACH MESSAGES

P5 · Email · Learning-sciences researcher

SCHEDULED · WED 30 SEP

To: a learning-sciences researcher (ISLS) · [open ↗](#)
Subject: 20 minutes of critique on a transfer-task study? · 58 words

Dear Dr [Name], I'm Sam Quansah, founder of Algo Peers and a Harvard GSE student, writing independently. I read your work on [topic]. We're planning a small feasibility study of whether children aged 9–12 can use the change-one-thing idea in an unfamiliar task. Before we fix the sample and measures, could I ask you 20 minutes of questions?

R1 · Community post · Facilitator community

SCHEDULED · THU 1 OCT

Where: micro:bit Champions community · [open ↗](#)
Posted only with moderator permission · 61 words

Hello. I'm Sam Quansah from Algo Peers, which runs hands-on learning for children in Ghana. With the moderators' permission, I'm asking facilitators who run sessions for 9–12-year-olds about a recent session: what happened, what got in the way, and how you judged what each child could do afterwards. A 15-minute call or a voice note would help. There's nothing to buy.

R2 · LinkedIn message · Programme owner

SCHEDULED · THU 1 OCT

To: a programme owner (e.g. The MakersPlace) · [open ↗](#)
Connection note, then message · 57 words

Dear [Name], I'm Sam Quansah, founder of Algo Peers in Cape Coast. I see you lead [Programme]. I'm talking with people who run recurring hands-on learning for children about how they decide what to keep, change or pay for, and what evidence they use. Would you share your experience in a 20-minute call? I'm asking, not selling.

R3 · Forum / DM · Makerspace practitioner

SCHEDULED · THU 1 OCT

Where: Scratch Educator Meetups · [open ↗](#)
Direct message to a meetup organiser · 60 words

Hi [Name], I'm Sam Quansah from Algo Peers in Ghana, where we run children's physical-computing sessions. I'm researching how practitioners notice whether a child has understood an idea, like testing one change at a time, rather than just finishing the build. Could you describe the last time you weren't sure? A reply, voice note or 15-minute call would be welcome.

FIRST OUTREACH MESSAGES

R4 · Reddit post · Parent community

SCHEDULED · FRI 2 OCT

Where: r/homeschool · [open ↗](#)
Posted only after moderator approval · 56 words

Hello. I'm Sam Quansah, founder of Algo Peers. With the moderators' permission, I'd like to hear from parents of 9–12-year-olds about a recent time your child made or investigated something, and how you could tell what they understood, especially if an app or AI helped. I'm not contacting children. A 15-minute conversation with you would help.

R5 · Email · Assessment researcher

SCHEDULED · FRI 2 OCT

To: an assessment researcher (ISLS) · [open ↗](#)
Subject: How would you test transfer, cheaply? · 62 words

Dear Dr [Name], I'm Sam Quansah, founder of Algo Peers and a Harvard GSE student, writing independently. Your work on [topic] fits a question we're working on: how to tell, validly and cheaply, whether a child can use an idea in a task that looks different weeks later. Could I ask you a few questions in 20 minutes? I'd welcome your critique.

Send schedule, week 1

Mon 28 Sep: P1, P2 · Tue 29: P3, admin request for P4 · Wed 30: P4, P5 · Thu 1 Oct: R1–R3 · Fri 2 Oct: R4, R5. **In person:** Cape Coast programme owner canvassing, Tue 29 Sep – Sat 3 Oct.

How we measure v1

Per message: sent, replies within 5 days, qualified, interviews booked.
Screenshots of each sent message go into the [tracker](#) the same day.

REFINED OUTREACH MESSAGES

P1 · Email · GRAF / club owner

SCHEDULED · MON 5 OCT

To: Ghana Robotics Academy Foundation (website contact) · [open ↗](#)
Subject: Robofest congratulations, and a question about your clubs · 59 words

Dear [Name], congratulations on the 2026 Robofest Junior title. Can you describe the last time a club member built something well but struggled when the challenge changed? I'm Sam Quansah, founder of Algo Peers in Cape Coast, researching exactly that. There's nothing to sell. Could you point me to two coaches for a 15-minute call or a voice note?

P2 · Email · Ghana Code Club

SCHEDULED · MON 5 OCT

To: Ghana Code Club team · [open ↗](#)
Subject: A research question on keeping hands-on sessions going · 50 words

Dear Ghana Code Club team, a research question, not a pitch: when a trained facilitator moves on, what keeps a centre's hands-on sessions going? I'm Sam Quansah (Algo Peers, Cape Coast). A 15-minute call or a short voice note from someone who supports your facilitators would help us a lot.

P3 · Formal letter (email) · Ghana Library Authority

SCHEDULED · TUE 6 OCT

To: Ghana Library Authority, Programme Office · [open ↗](#)
Subject: Request for a 20-minute conversation with a librarian · 50 words

Dear [Programme Office], with your permission I'd like to learn from one librarian who ran the children's coding sessions: what helped the sessions continue with few devices, and what children could still do weeks later? 15 minutes, voluntary, with a summary shared back. Sam Quansah, founder, Algo Peers (Cape Coast).

P4 · Facebook group post · Participatory Library group

SCHEDULED · TUE 6 OCT

Where: MakerSpaces and the Participatory Library · [open ↗](#)
Posted only after admin approval (requested Tue 29 Sep) · 61 words

With the admins' OK: can you describe the last time a child finished a maker project, maybe with a tutorial or AI helping, and you weren't sure they could do it alone next time? I'm collecting stories (no product, nothing to buy) for independent research. Comment or message me; a 10-minute chat or voice note is plenty. Sam Quansah, Algo Peers

REFINED OUTREACH MESSAGES

SCHEDULED · WED 7 OCT

Where: micro:bit Champions community · [open ↗](#)
Posted only with moderator permission · 45 words

Facilitators of 9–12-year-olds: can you describe your last hands-on session where a child finished but you weren't sure what they'd learned? There's nothing to buy. I'm Sam Quansah (Algo Peers, Ghana), collecting real examples. A voice note or 10-minute call helps. Posted with moderator permission.

R2 · LinkedIn message · Programme owner

SCHEDULED · WED 7 OCT

To: a programme owner (e.g. The MakersPlace) · [open ↗](#)
Connection note, then message · 48 words

Dear [Name], quick question as someone who runs [Programme]: what was the last thing you paid for to improve your hands-on sessions, and how did you decide? I'm researching this, not selling anything. Would you share it in a 15-minute call? Sam Quansah, founder, Algo Peers (Cape Coast)

R3 · Forum / DM · Makerspace practitioner

SCHEDULED · THU 8 OCT

Where: Scratch Educator Meetups · [open ↗](#)
Direct message to a meetup organiser · 44 words

Hi [Name], can you describe the last time a child finished a build but you doubted they understood why it worked? I'm Sam Quansah (Algo Peers, Ghana), researching how practitioners spot real understanding. A two-line reply or voice note is plenty. Nothing to sell.

REFINED OUTREACH MESSAGES

R4 · Reddit post · Parent community

SCHEDULED · THU 8 OCT

Where: r/homeschool · [open ↗](#)
Posted only after moderator approval · 49 words

Parents of 9–12-year-olds: when your child last built or tested something, how could you tell what they really understood, especially if an app or AI helped? I'm Sam Quansah (Algo Peers), researching this. I'm not contacting children and there's nothing to buy. A 10-minute chat with you would help.

R6 · Same channel as v1 · Follow-up (once, day 5–7)

SCHEDULED · FRI 9 OCT

To: everyone who has not replied after 5–7 days
One follow-up only; no third message · 43 words

Hello [Name], following up once on my note about [recent sessions]. If now isn't a good time, no problem and no need to reply. If you'd like to help, a short voice note or 10 minutes would be very welcome. Thank you, Sam

What changed from v1

Open with "Can you describe the last time..."; say "nothing to buy" early; offer a voice note; about a third shorter; one follow-up only (R6).

When v2 goes out

Mon 5 – Fri 9 Oct, to new contacts in the same communities and to v1 non-responders. We compare reply rates, v1 against v2, per channel. All 20 messages: [outreach messages](#).

TEN INTERVIEWS SCHEDULED, ONE TRACKER

WHAT SECONDARY RESEARCH ALREADY SHOWS

SECONDARY · SOURCED

The market is large and the need is real

After-school programmes are a **\$29–53B** global market (2025 estimates). **70%** of 10-year-olds in low- and middle-income countries can't read a simple text ([World Bank learning poverty](#)). Structured AI tutoring gave **~0.37 SD** maths gains in Ghana ([Rori RCT](#)), so answers are getting cheap: NBC must win on hands-on capability, not tutoring.

SECONDARY · SOURCED

Where our buyers and users are

Ghana networks are organisation-led: [Ghana Code Club](#) (7,000 teachers, 22 centres), [GRAF](#), [libraries](#) (15). So **introductions beat posts**. Cape Coast programme owners have **no online community**, so we canvass in person. Global practitioner networks ([micro:bit Champions](#), 382 educators in 51 countries) give contrast sites.

REHEARSAL · NOT EVIDENCE

Questions to test

A rehearsal of our script with 10 simulated personas suggested: sessions stop when "the one person" is absent; buyers want peer proof and written terms more than a lower price; parents judge on exam marks. **Treated only as questions** ([method](#)).

Primary findings: scheduled. The consolidated findings document fills in as the 10 interviews happen (30 Sep – 9 Oct) and is due **Sun 11 Oct**, reported by segment with counts and denominators. Live document: [tracker and findings](#).

TEN INTERVIEWS, FIVE PROBLEMS TO RATE

PARTICIPANT	SOURCE	ROLE	INTERVIEW	P1 CAN'T TELL IF SKILL TRANSFERS	P2 STOPS WITHOUT KEY FACILITATOR	P3 PREP TIME TOO HIGH	P4 HARD TO SHOW FAMILIES PROGRESS	P5 NO BUDGET ROUTE
Owner 1	GRAF club owner	Buyer	Thu 1 Oct	.	.	.	.	.
Owner 2	Cape Coast after-school owner	Buyer	Wed 30 Sep	.	.	.	.	.
Owner 3	Cape Coast after-school owner	Buyer	Fri 2 Oct	.	.	.	.	.
Parent 1	Algo Peers family (connected)	Buyer	Sat 3 Oct	.	.	.	.	.
Facilitator 1	Ghana Code Club centre	User	Mon 5 Oct	.	.	.	.	.
Facilitator 2	Ghana Code Club centre	User	Tue 6 Oct	.	.	.	.	.
Librarian	Ghana Library Authority	Host	Wed 7 Oct	.	.	.	.	.
Library maker lead	Participatory Library group	User	Thu 8 Oct	.	.	.	.	.
Parent 2	r/homeschool	Buyer	Fri 9 Oct	.	.	.	.	.
Researcher	ISLS member	Research	Fri 9 Oct	.	.	.	.	.

Rating: 0 not raised • 1 raised when asked • 2 raised with an example • 3 raised unprompted with a recent example.

Confirmed problem (set in advance): 6 or more of 10 rate it 2+, including at least 3 of 5 buyers.

Callouts after 9 Oct: n/10 per problem, by segment; never averaged across segments.

HOW THIS TACTIC MOVES NBC

How it relates to our business

It decides our first customer and problem. The v5 plan depends on one recurring problem and one buyer, confirmed by people outside our network.

Steps we took

- 1 · Defined segments and qualification rules.
- 2 · Mapped 20 watering holes from sources; picked 10.
- 3 · Wrote the PMR script.
- 4 · Drafted 10 messages, then 10 revisions.
- 5 · Built the tracker and insights grid.
- 6 · Rehearsed the script with simulated personas.
- 7 · Scheduled sends (28 Sep – 9 Oct) and 10 interviews.

Link to earlier tactics

Builds on our segmentation, personas and the 24-step business plan. Synthetic studies shaped the questions; real PMR now tests them.

Leverage it in future

The same watering holes recruit pilot sites, outside facilitators and a contrasting research site.

How it advances NBC

It feeds our first pass line: offers to 10 qualified buyers, and 3 paid commitments, by week 6.

LEARNING WORLDS ARE DESIGNED EXPERIENCES

1 · Belong

A story and a real problem from the child's world.

2 · Investigate

Build with micro:bit, sensors and everyday materials; ask AI good questions.

3 · Understand

Predict, test, explain, revise.

4 · Apply

Build for someone real; show the skill in a new situation.

Example already run by Algo Peers, Farm World: 51 learners aged 7–15 from 34 communities (53% girls) built 7 working prototypes for food security. Participation and outputs, not a measured learning effect.

MARKET SIZE AND FIVE-YEAR SCENARIOS

\$29–53B

TAM

Global after-school programmes, 2025 industry estimates. 1.4B students enrolled worldwide (UNESCO, 2024).

~\$99M

SAM

Ghana's ~27,400 primary and junior high schools × \$3,600 a site a year.

\$3.2M

SOM, year 5

800 sites, central scenario. Low \$0.36M; high \$11.3M.

Projections from stated assumptions, not forecasts; rebuilt from pilot data. Details: [economics and scenarios](#) · [benchmarks](#).

EIGHT WEEKS TO A CLEAR DECISION

WEEK	DATES	WORK	DEADLINE / DECISION
1	28 Sep – 4 Oct	Send P1–P5; canvass Cape Coast; first 6 conversations	Which learning problem and buyer to serve
2	5 – 11 Oct	12–16 conversations; task review; costed pilot offer; v2 messages	One offer and one bounded learning claim
3	12 – 18 Oct	Task usability sessions; baseline; offers to 10 qualified buyers	Fix tasks; choose the least capture that works
4	19 – 25 Oct	Outside facilitators deliver; log prep, help and explanations	Kit, supported programme or redesign
5	26 Oct – 1 Nov	Delayed, unfamiliar task, scored blind	Is richer capture worth it?
6	2 – 8 Nov	Repeat delivery; payments, decisions and costs	Pass line: 3 of 10 buyers pay
7	9 – 15 Nov	Contrasting site, if access is ready	What travels, what needs adapting
8	16 – 20 Nov	Review every gate	Closeout 20 Nov: repeat, simplify, change payer or pause

Weekly: submit the tactic deck (PDF) and update the decision record. Plan: [dated deadlines](#) · [v5 tactical playbook](#).
