THE VENTURE

ANSWERS ARE CHEAP. TRYING AGAIN IS NOT.

AI makes answers cheap, but the chance for children to investigate, build, get it wrong and try again is still costly. NBC builds **programmable physical learning environments where children build, experiment and develop capabilities with shared AI**, starting from five years of Algo Peers practice in Cape Coast, Ghana.

FIRST CUSTOMER

People who run after-school and holiday programmes for children aged about 9–12.

THE OFFER

Learning Worlds: reusable physical experiences, facilitator guidance and a short evidence summary.

STAGE

Pre-seed. Algo Peers has reached 1,000+ children; NBC pilots start this term.

THE BRIEF

UNDERSTOOD IN FIVE SECONDS. TRUSTED ENOUGH TO CALL.

FAMILY RESEMBLANCE BUILDS TRUST.

A one-colour mark in the Algo Peers family borrows five years of credibility instead of starting from zero.

SPEAK TO THE ONE WHO DECIDES.

A graphic written for the programme owner, our buyer, explains the offer better than one written about children.

HONESTY OUTPERFORMS HYPE.

A light website with a plain "where we are" earns more trust than a dark site built on one big idea.

How we'll know: two versions of every asset, then five-second tests of v1 against v2 with five programme owners ("What does NBC do? Who is it for?"), and pilot conversations booked from the site and signature.

TESTS PLANNED · WEEK OF 7 OCT

THE MARK

From a field of changing pieces to a single shape that holds the whole idea.

IT BEGAN WITH ONE
CHANGED PIECE.

Next Billion Children

A field of identical pieces, a square with one rounded corner. One piece turns and lights up in marigold. The idea in a glance: **change one thing.**

LOGO CONCEPT 2 · 25 SEP 2026

THEN WE TURNED
THE LIGHTS DOWN.

A night ground. Outlined pieces wait; one lights up when a child acts. Condensed poster type. Light marks a try, never a grade.

SIMPLER ALTERNATIVES · 26 SEP 2026

FIVE WAYS TO SAY IT. ONE THAT LASTS.

A The piece · chosen

B Before → after

C Lit full stop

D Lit O

E Three tries

We chose **A, the piece**: it reads at favicon size, survives in one colour, and doubles as a node in our capability diagrams.

ONE PIECE. ONE COLOUR. EVERY SURFACE.

WHAT CHANGED

WHAT WE KEPT. WHAT WE LET GO.

1 Kept the piece from concept A; it is now the symbol.

4 Dropped the grid; lights now mark tries inside products.

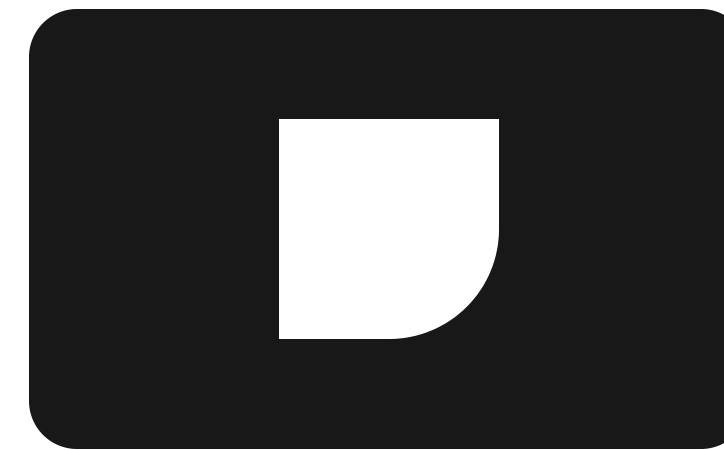

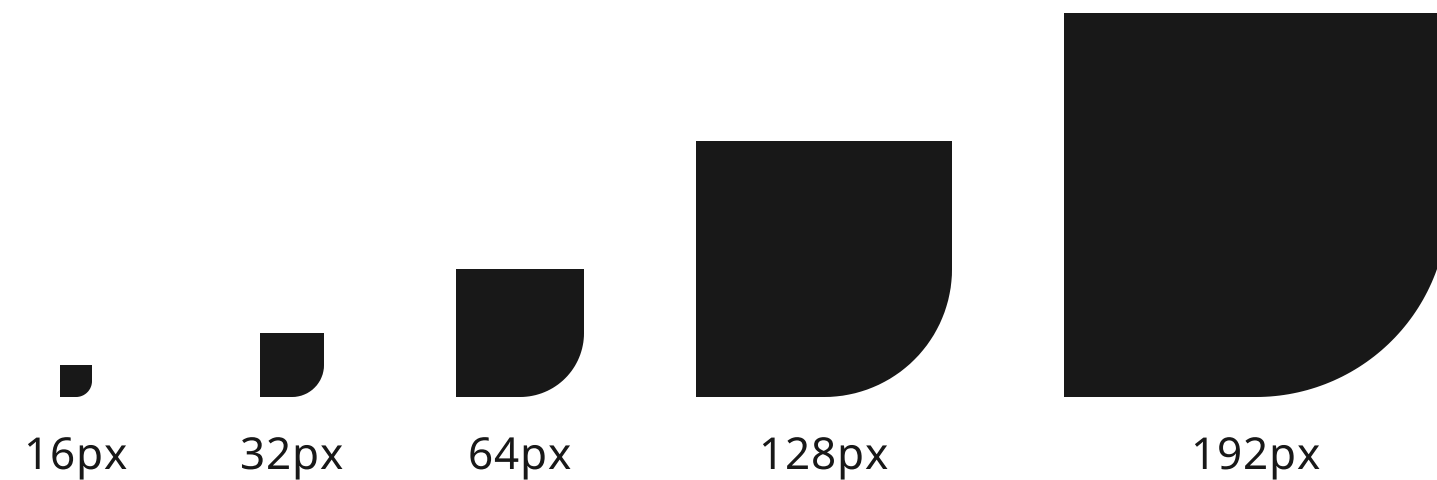

2 Expanded type: Unbounded capitals, the Algo Peers family voice; it covers ε, ɔ and η.

5 Left the endorsement out: "a venture by Algo Peers" was tested; Algo Peers is named in text instead.

3 One colour only: ink on white, white on colour. No lights in the logo.

THE SYMBOL

THE PIECE IS THE SYSTEM.

Profile image and app icon

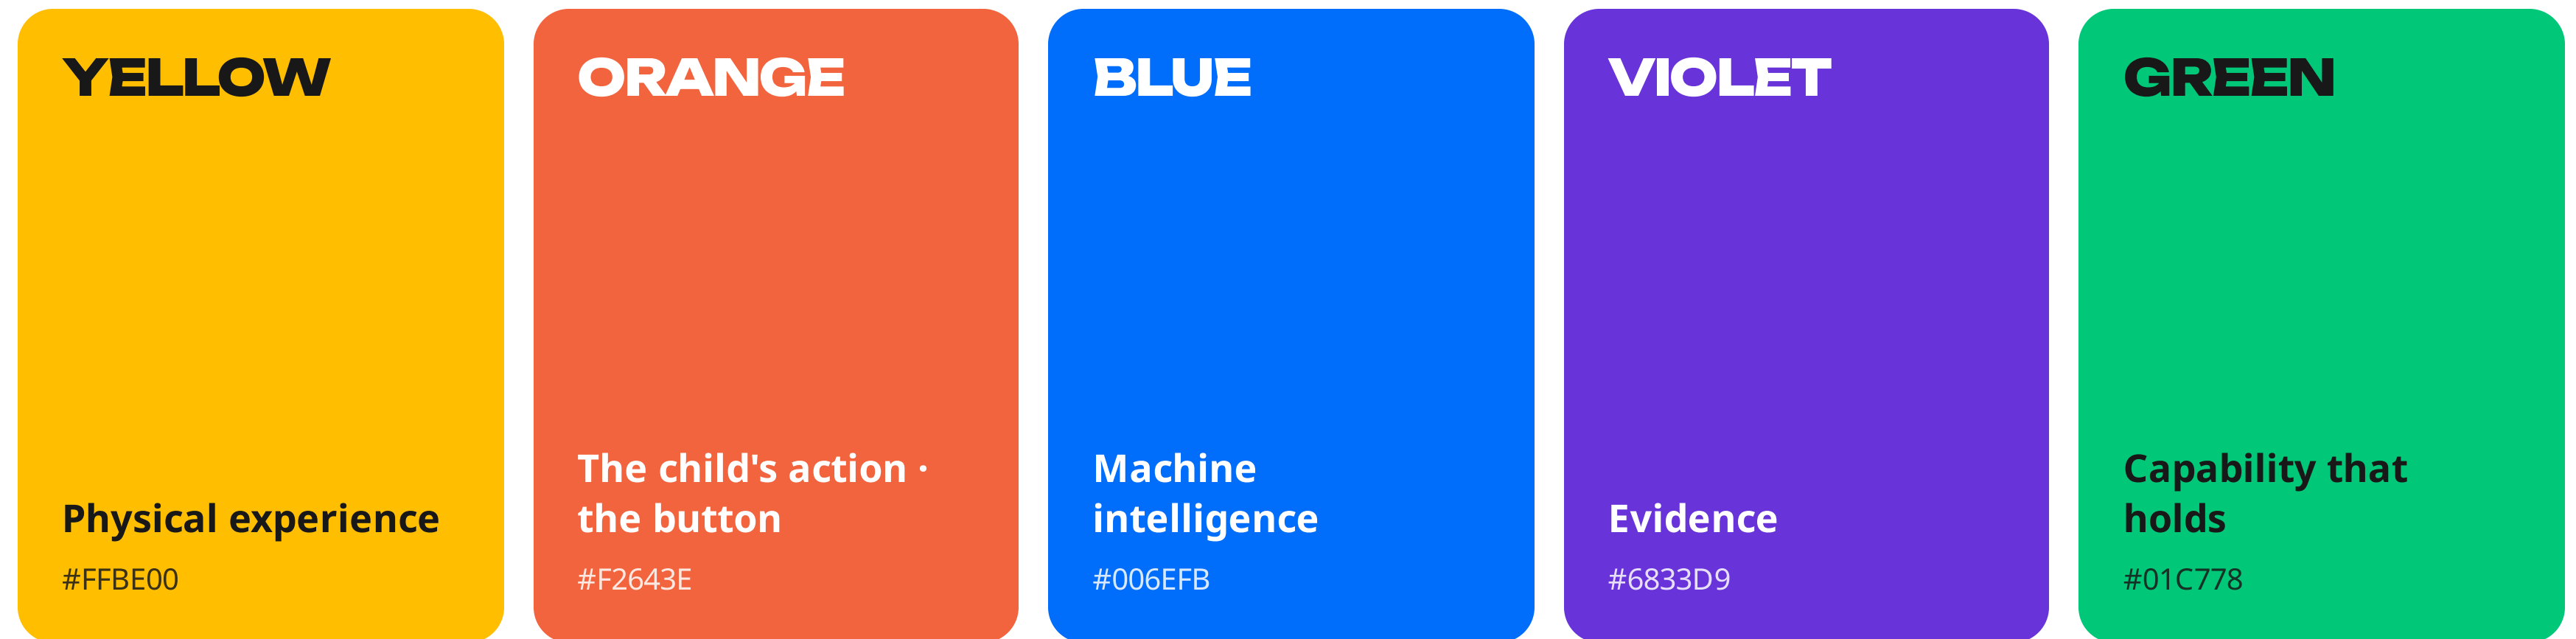

A node in capability diagrams

A square with one rounded corner: the same shape marks the brand, the bullet, the button corner and every evidence node.

COLOUR

FIVE COLOURS. FIVE JOBS.

Ink **#181818** and white carry the words. Green means a capability held when the task changed, **never a grade**.

TYPE

**A LOUD VOICE.
A CLEAR ONE.**

Ad

UNBOUNDED EXTRABOLD

Headlines, in capitals, tight. Covers Ghanaian letters: **ɛɔɲ**

Noto Sans

Everything people read: body, captions, interfaces. Hundreds of languages.

Andika

Children's screens: letter shapes made for early readers.

VOICE

**SAY IT THE SAME WAY,
EVERY TIME.**

 MASTER

**LEARNING INFRASTRUCTURE FOR THE NEXT BILLION
CHILDREN.**

 VISION

TURN INTELLIGENCE INTO CAPABILITY.

 OFFER

CHANGE ONE THING.

 PROOF

**WHAT WE KNOW. WHAT WE'RE TESTING. WHAT ISN'T
SHOWN.**

THE STORY

One graphic that tells a programme owner what NBC gives them, and what they can show for it.

FIRST DRAFT: ABOUT THE CHILD.

AI MAKES ANSWERS CHEAP. TRYING AGAIN SHOULDN'T BE.

01

INVESTIGATE

Ask what will happen.

02

BUILD

Set up the ramp, the circuit, the garden.

03

GET IT WRONG

The car stops short. Good.

04

TRY AGAIN

Change one thing. Test it.

Learning Worlds give children the chance to investigate, build, get it wrong and try again, with shared AI.

NBC · Value graphic v1 · 5 Oct 2026

WHAT OUR REVIEW FOUND

- It speaks to children, but the programme owner is the one who buys.
- It never says what the buyer gets, or what they can show for it.
- Colours decorate instead of doing their jobs.
- There is no honest line about where we are.

REWRITTEN FOR THE PERSON WHO BUYS.

FOR PEOPLE WHO RUN AFTER-SCHOOL AND HOLIDAY PROGRAMMES

1

HANDS-ON LEARNING, READY TO RUN. EVIDENCE YOU CAN SHOW.

2

WHAT YOU GET

**A Learning World kit**
Reusable, low-cost materials for up to six children per kit.

**A facilitator card**
Each 45-minute session on one printed card, so any trained facilitator can run it.

**An assistant that checks with you**
Prepares, translates and suggests the next step. You confirm every suggestion.

**A short evidence summary**
What each child tried, how much help they had, and whether it held in a new task.

4

WHAT CHILDREN DO

**Investigate**
Ask what will happen.

**Build**
Set up the ramp, the circuit, the garden.

**Get it wrong**
The car stops short. Good.

**Try again**
Change one thing. Test it.

3

WHAT YOU CAN SHOW

Parents: how their child took on a challenge, in their child's own words.

Funders: what children could do when the task changed.

Your team: sessions that run without the one expert.

No scores, rankings or comparisons between children.

5

Where we are: feasibility pilots building on five years of Algo Peers practice in Cape Coast, Ghana. No learning results are claimed yet.

NBC · Value graphic v2 · 5 Oct 2026

- 1

Written for the **buyer**, the programme owner.
- 2

What you get: the four parts of the offer, named.
- 3

What you can show parents, funders and your team.
- 4

Colour jobs: each colour means one thing.
- 5

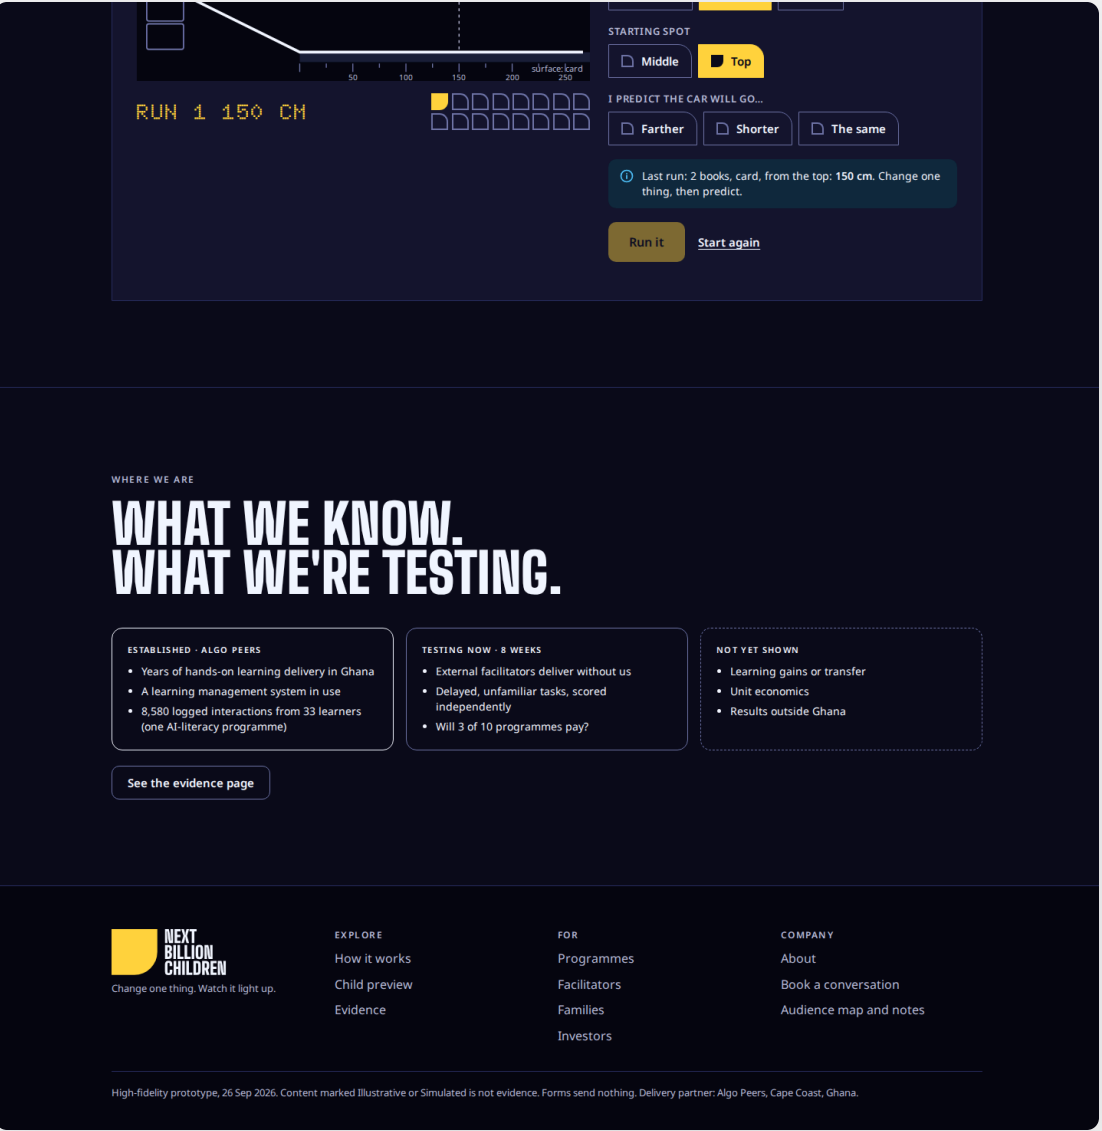

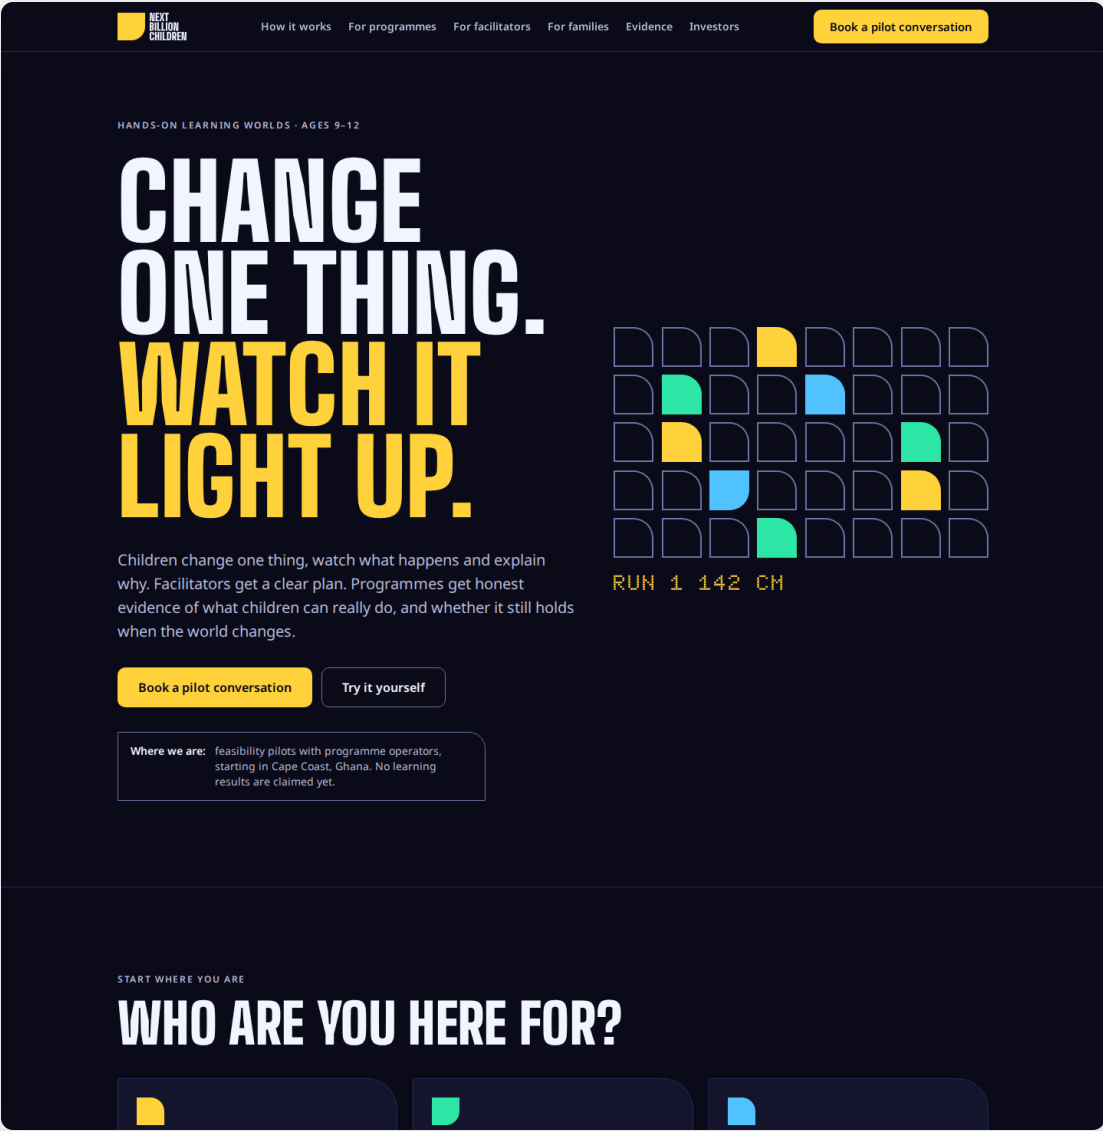

Honest status: no learning results claimed yet.

THE WEBSITE

Every page, shown whole. Version one, then version two.

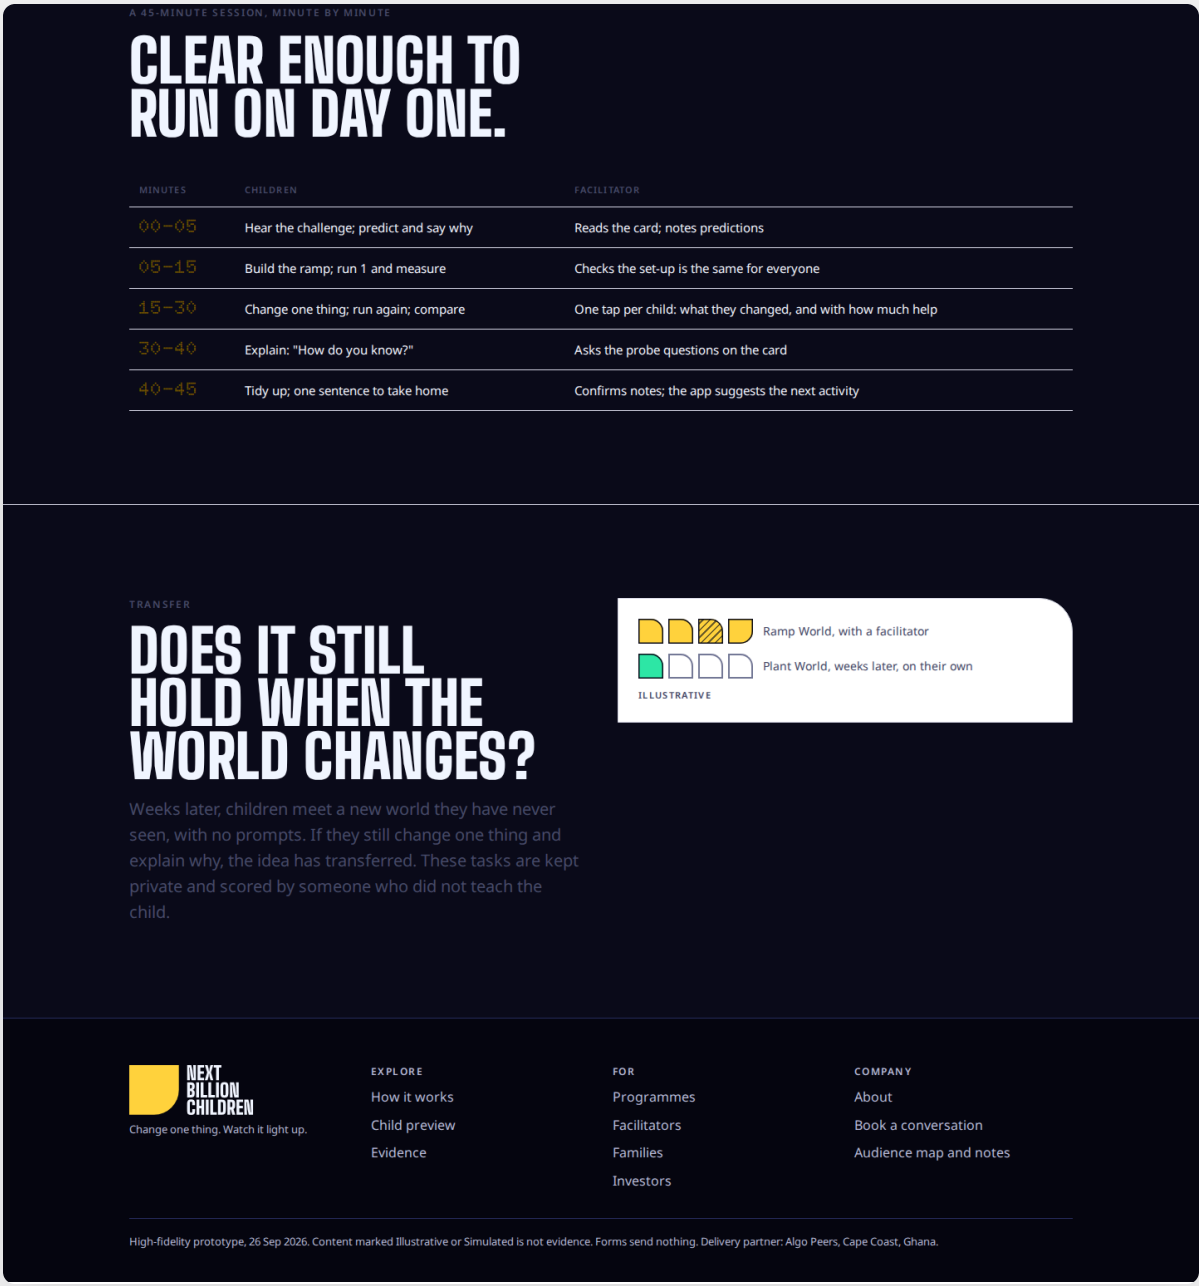

WE OPENED WITH A PROMISE TO CHILDREN.

A dark night sky where every try lights a piece. One idea, carried by the whole page. · read left to right

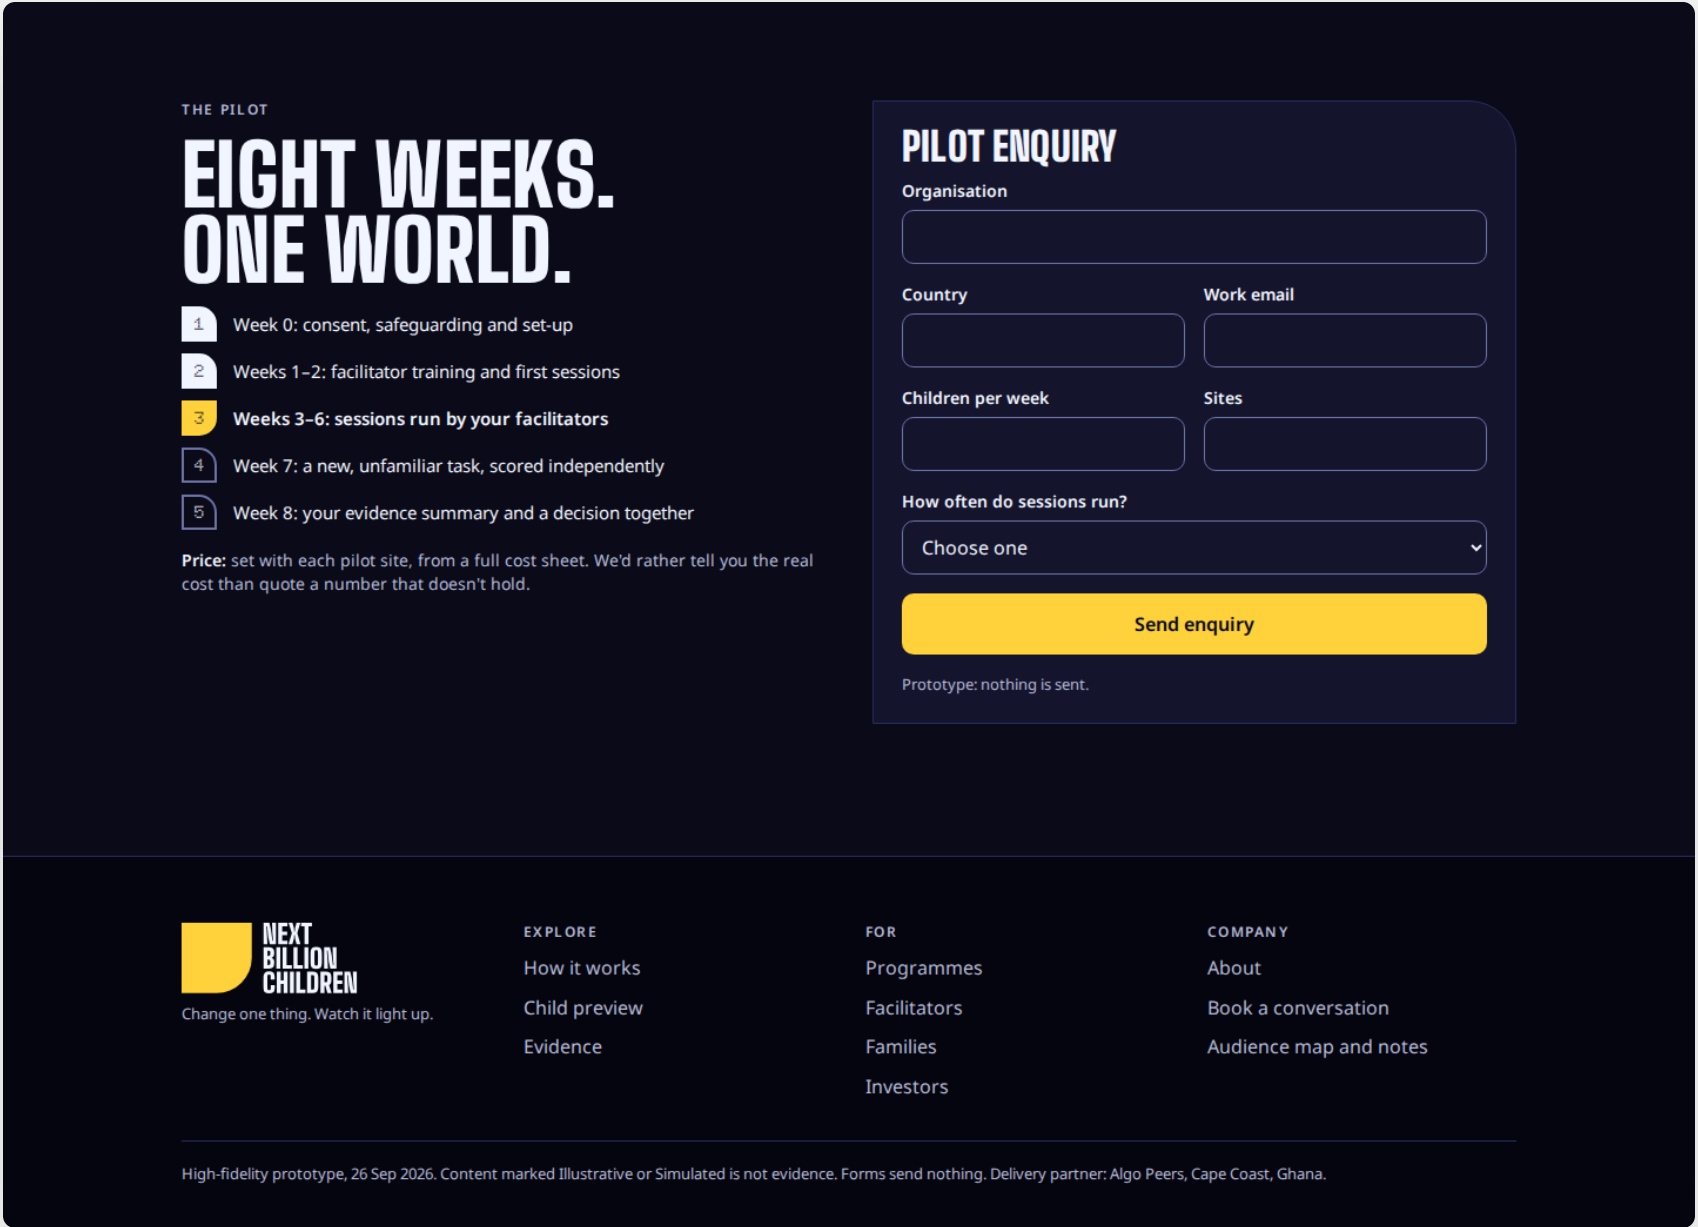

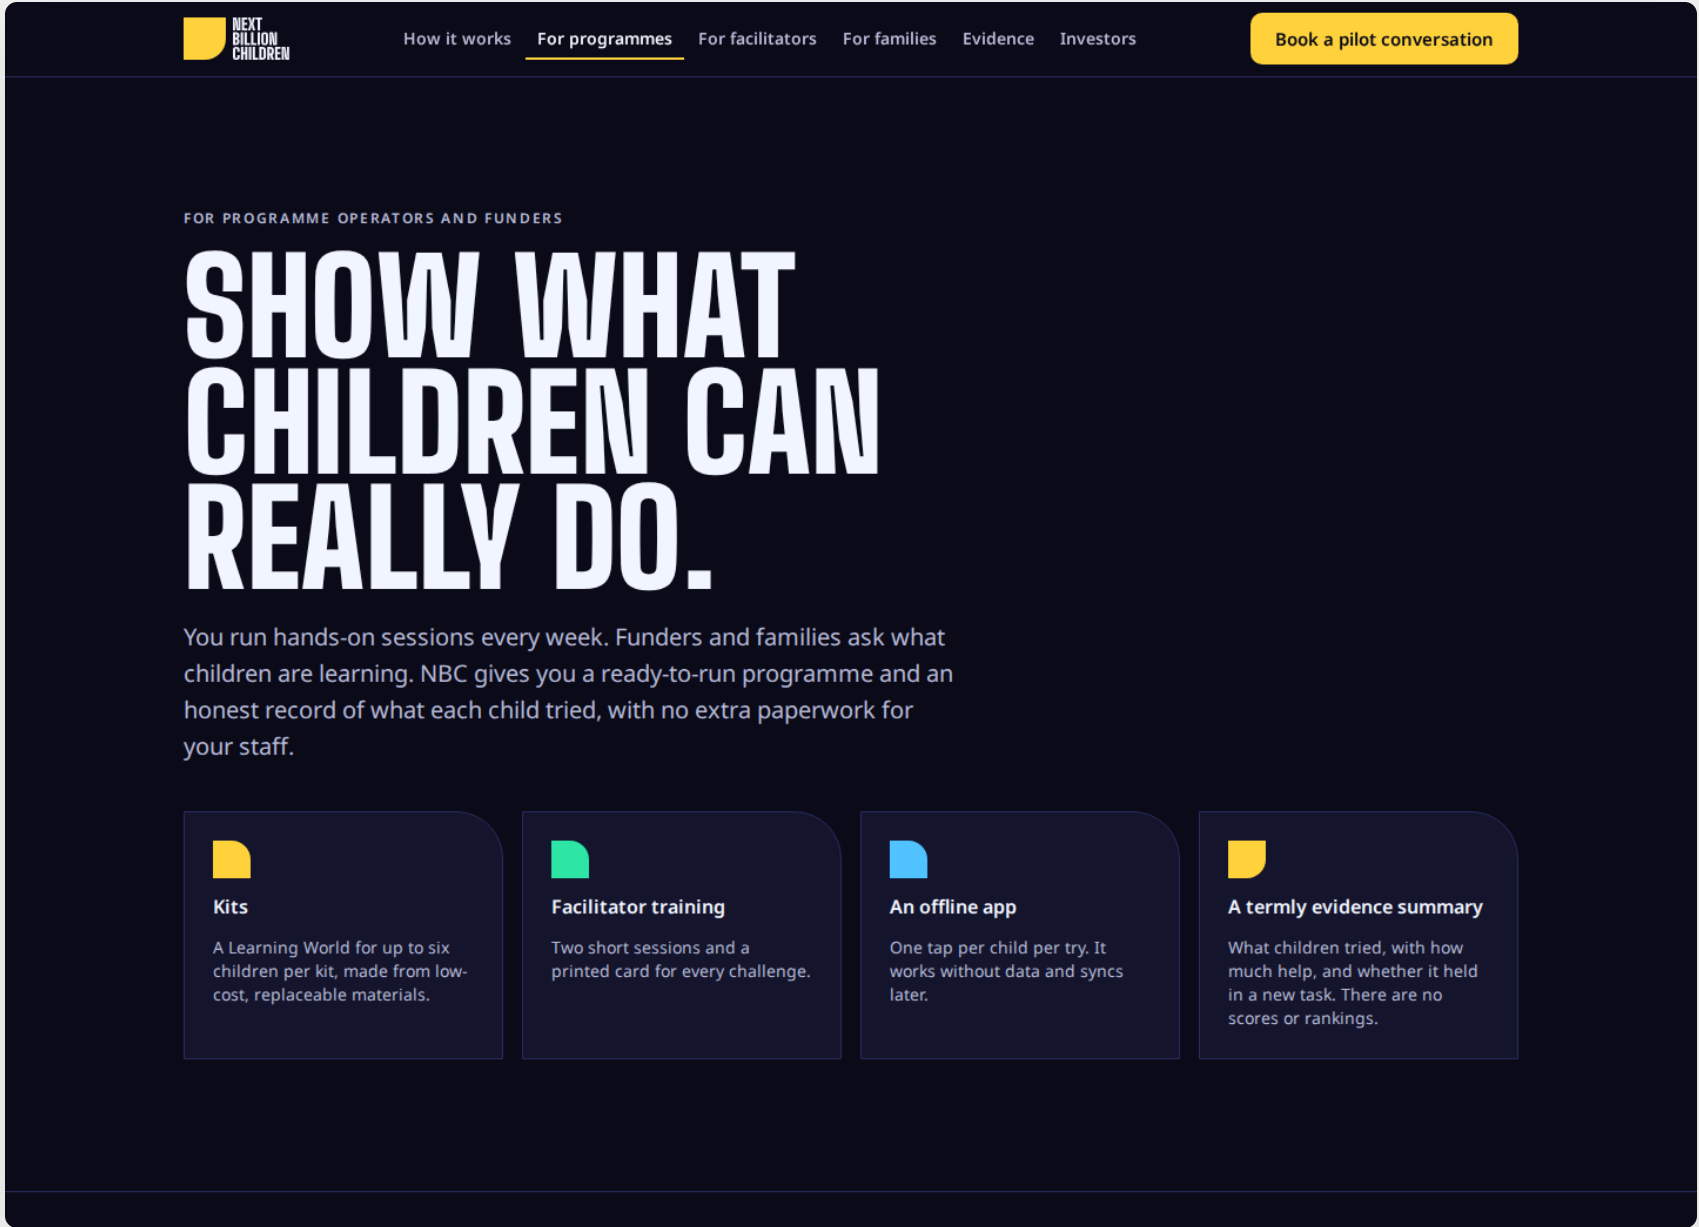

FOUR MOVES. ONE IDEA.

Predict, change one thing, run it, explain, with the Ramp World simulation. · read left to right

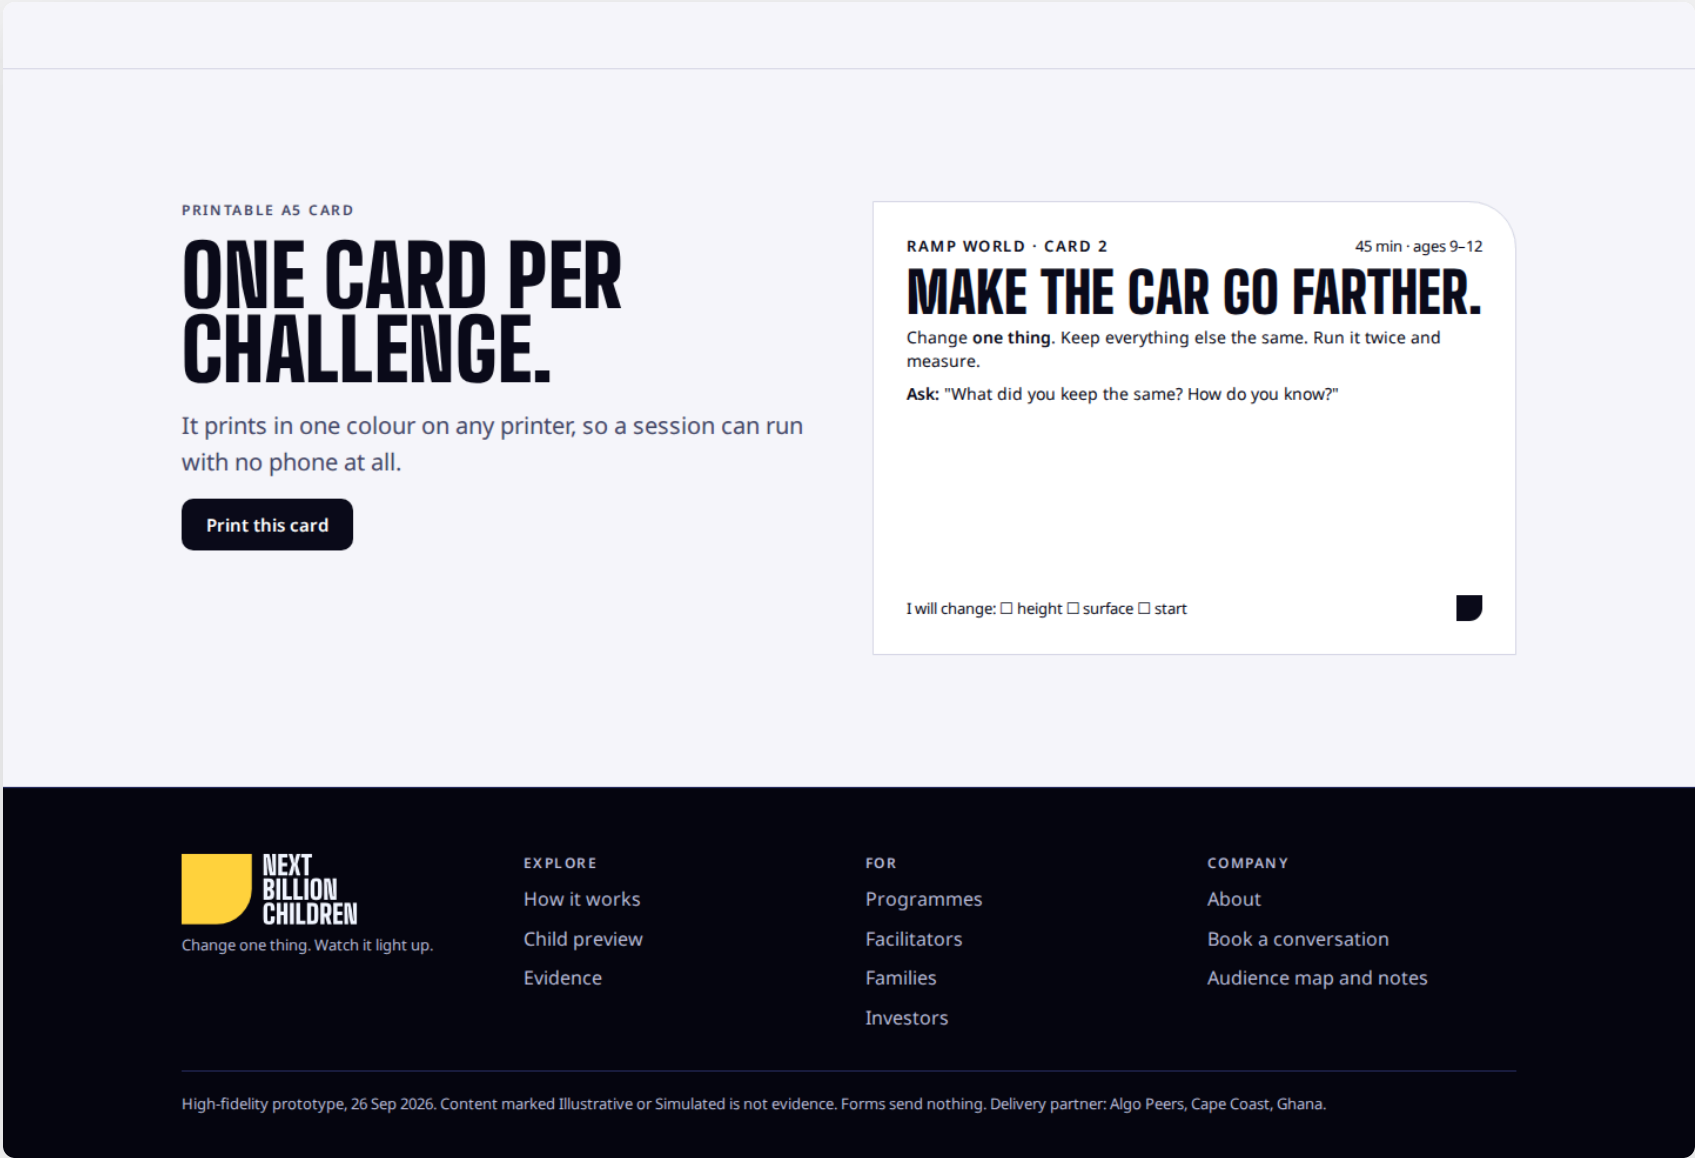

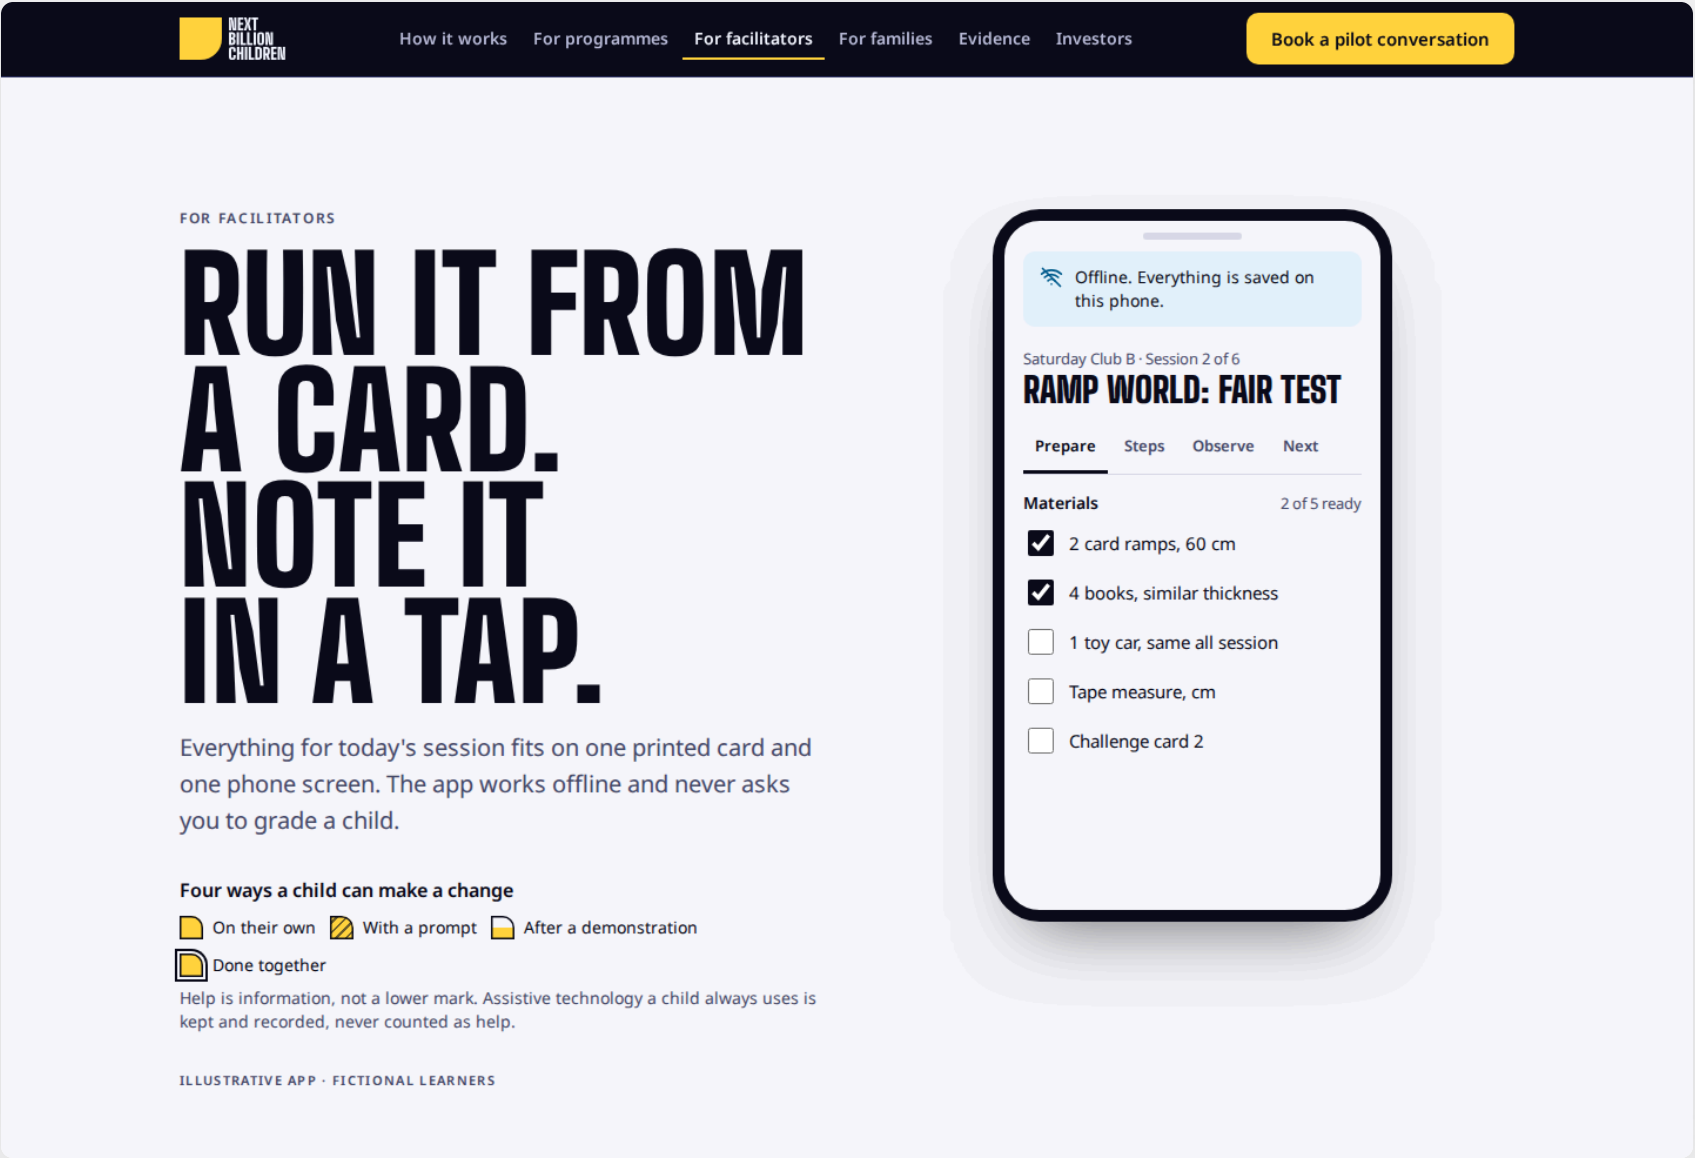

FOR THE PEOPLE WHO RUN THE ROOM.

The offer for programme owners: kits, training, an offline app and a termly summary. · read left to right

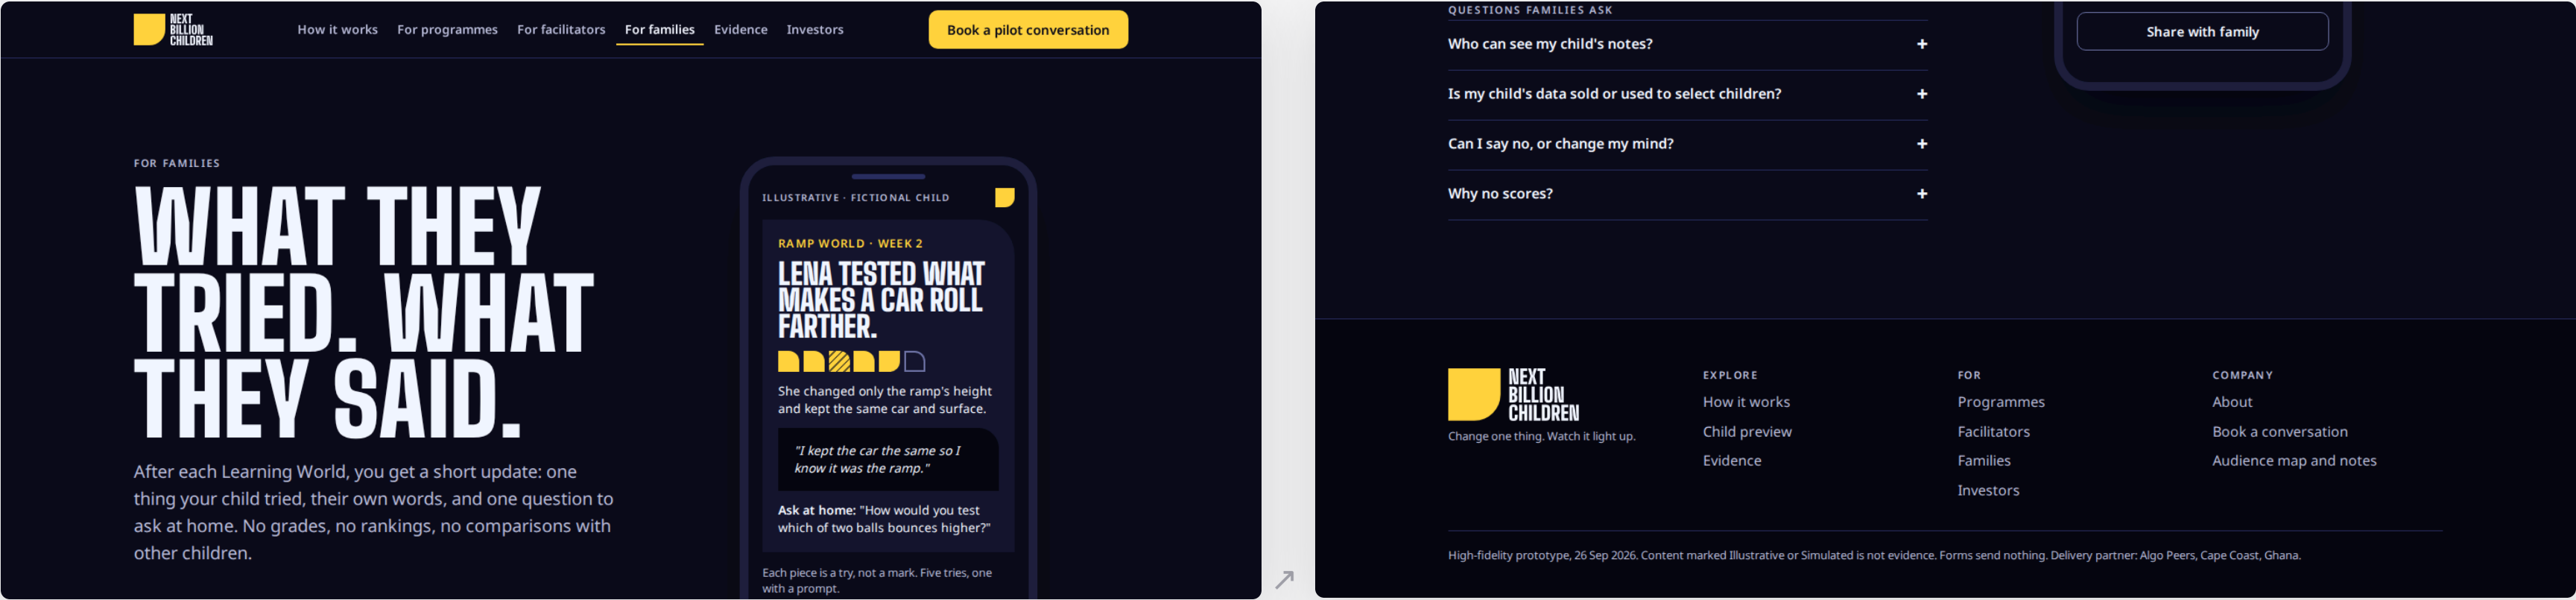

A CARD AND A TAP.

Everything for a session on one printed card and one phone screen. · read left to right

Book a pilot conversation

EVIDENCE

WHERE THE EVIDENCE STANDS.

We would rather be trusted than impressive. Here is what is established, what we are testing now, and what has not been shown yet.

ESTABLISHED · ALGO PEERS

- Years of hands-on learning delivery in Ghana
- A learning management system in use
- 8,580 logged interactions from 33 learners in one AI-literacy programme

Observed

To be confirmed

Founder-reported; period to confirm

TESTING NOW · 8 WEEKS

- Two external facilitators deliver sessions without the founding team
- Delayed, unfamiliar tasks, scored independently by someone who didn't teach the child
- The commercial gate: 3 of 10 approached programmes pay

NOT YET SHOWN

- Learning gains or transfer
- Unit economics
- Results outside Ghana

METHOD NOTE

The first task family is control of variables ("change one thing") for ages 9–12, where there is published evidence that children can learn and transfer the idea with explicit instruction plus probe questions. Capability claims will state how many tasks they rest on. Assessment tasks are held out: they never appear in demos, marketing or Show-Me days.

ETHICS AND CONSENT

No data is collected before ethics review, parental consent and child assent are in place. Children's data is never sold or used for selection. Necessary assistive technology is kept and recorded, never treated as help.

WE'LL PUBLISH WHAT WE FIND, INCLUDING WHAT DOESN'T WORK.

Change one thing. Watch it light up.

VERSION TWO: THE WHOLE THESIS, IN DAYLIGHT.

1 **Night → daylight:** the Algo Peers family colours and type.

4 **Three worlds, one capability,** instead of six unrelated worlds.

2 **A bigger headline:** "Learning infrastructure for the next billion children". "Change one thing" moves to the first world.

5 **Checks, not black boxes:** assistant suggestions you confirm; families can correct a record.

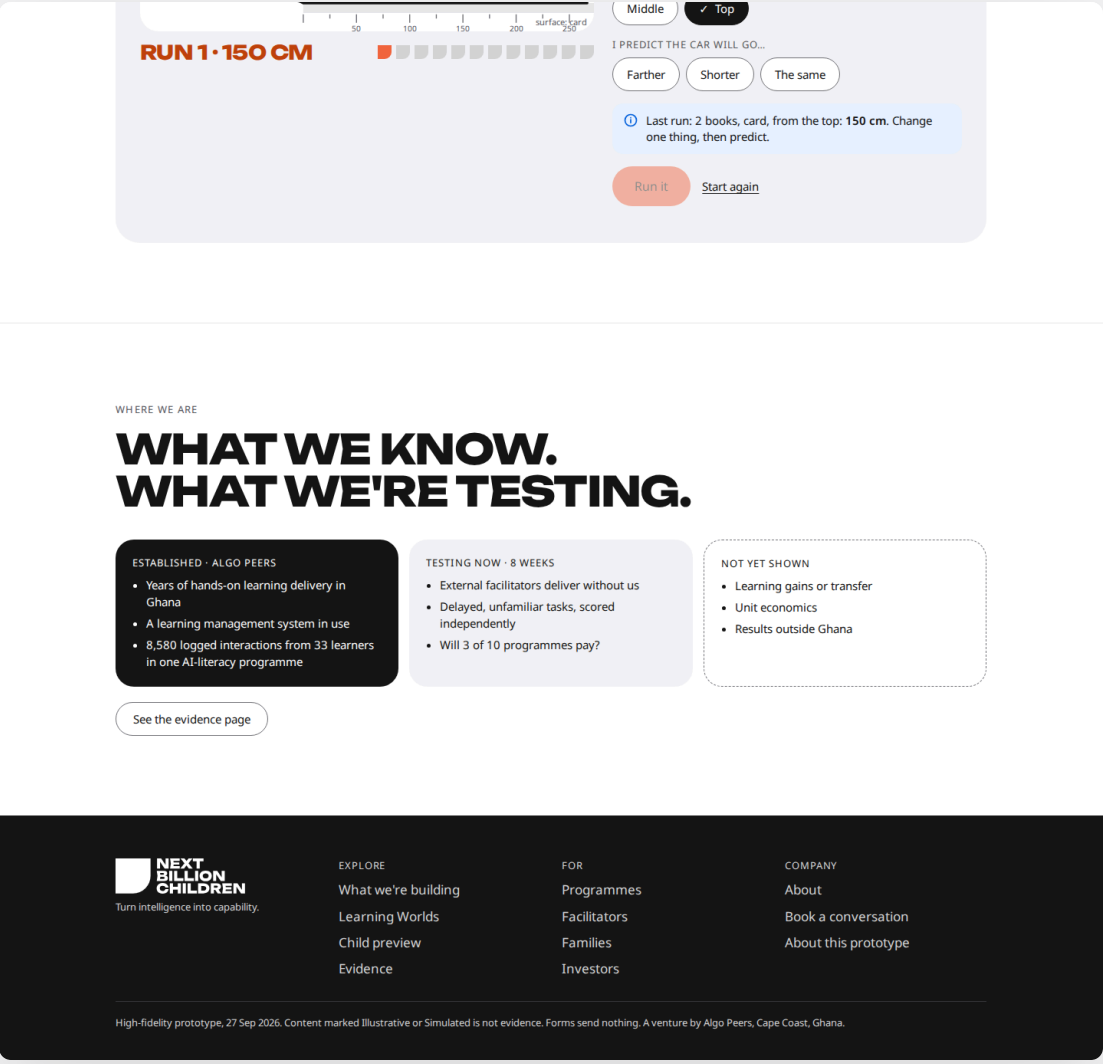

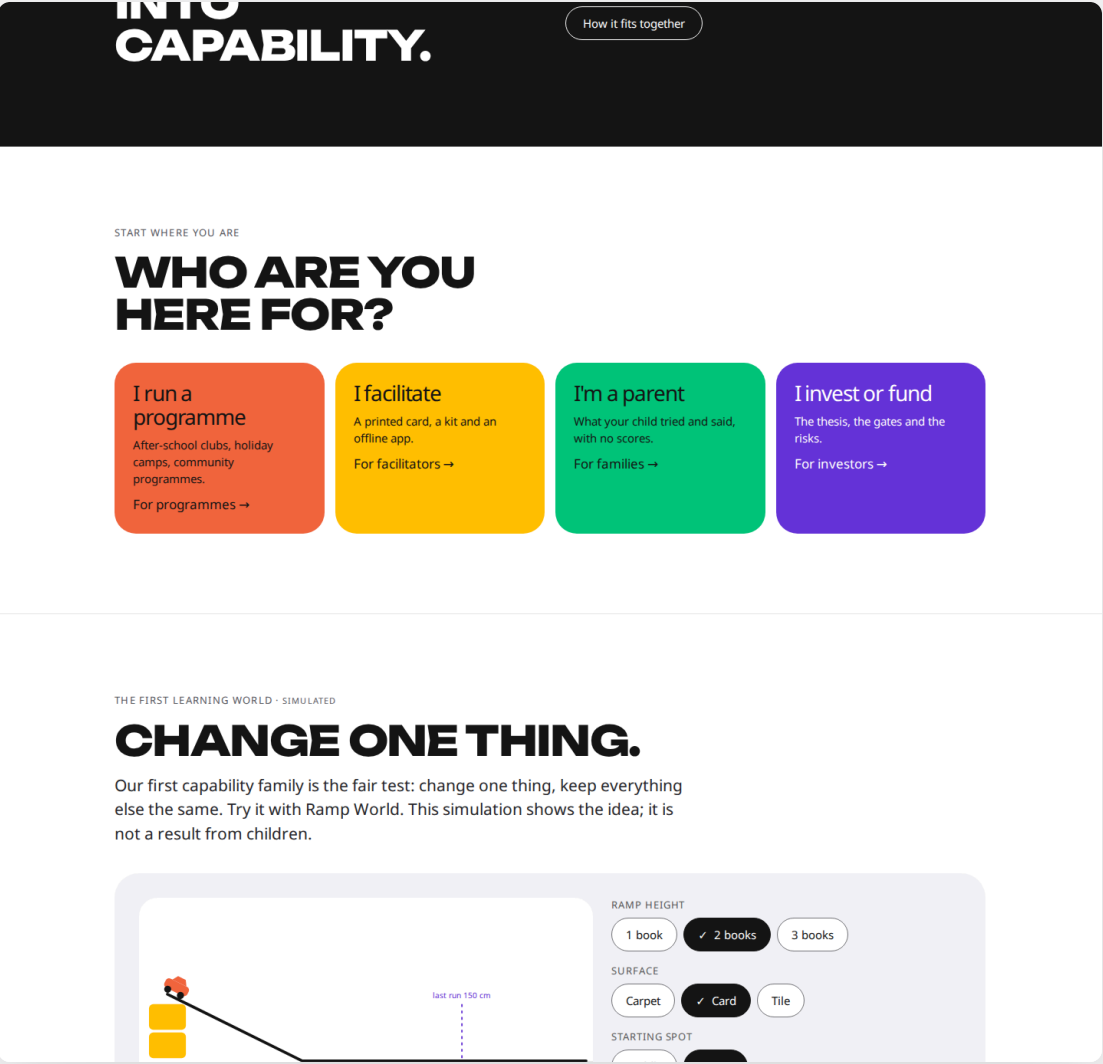

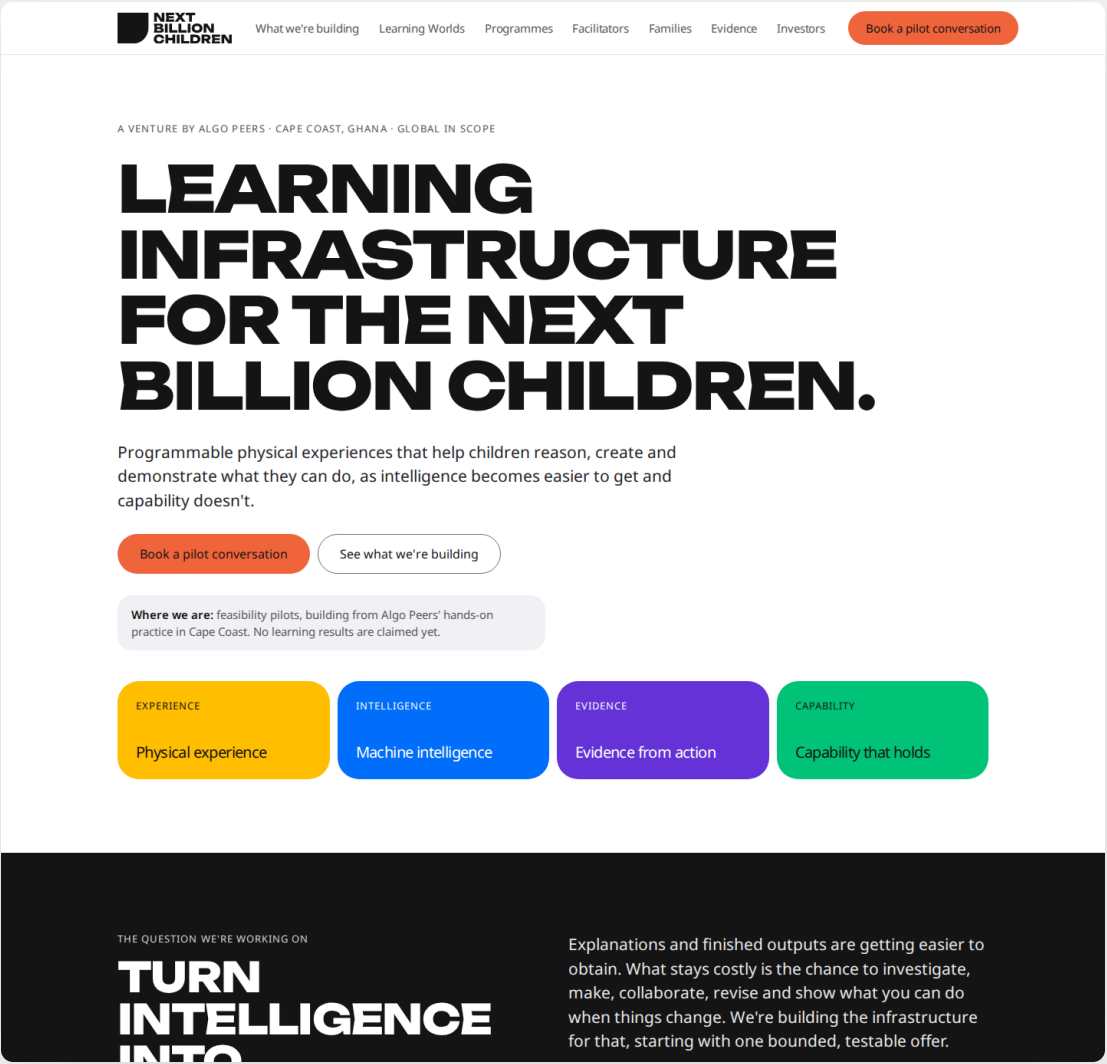

3 **What we're building:** a new page for experience, intelligence and evidence, with gates.

6 **One orange button,** "Book a pilot conversation", and an honest "where we are".

Live file: [github.com/samquansah-algo/nbc-tnt › site/index.html](https://github.com/samquansah-algo/nbc-tnt/blob/main/site/index.html)

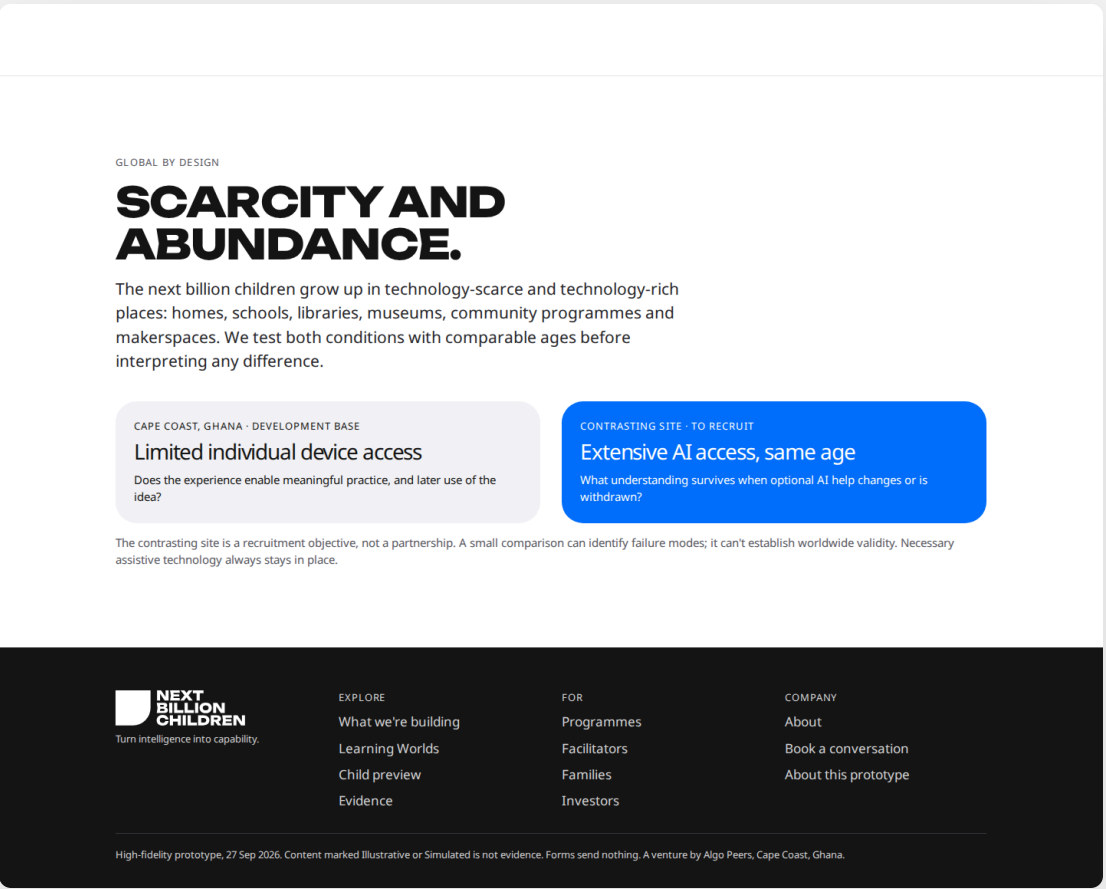

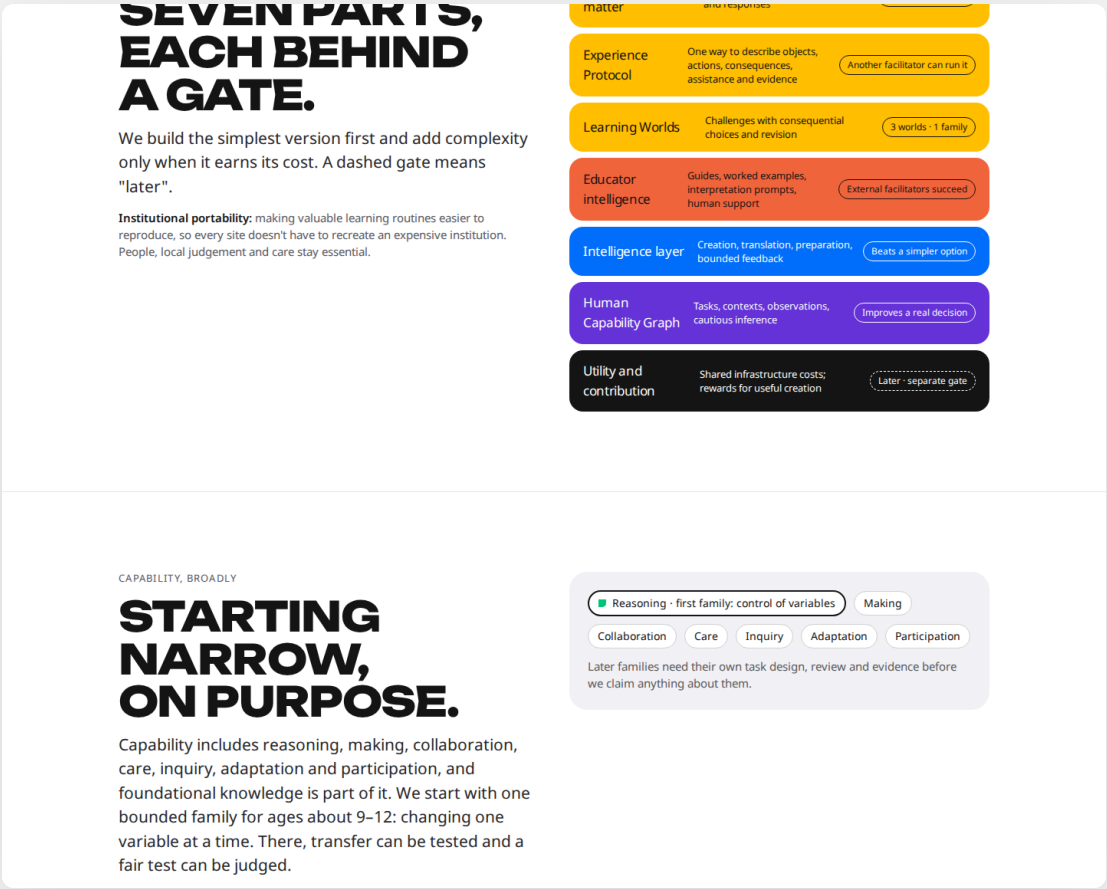

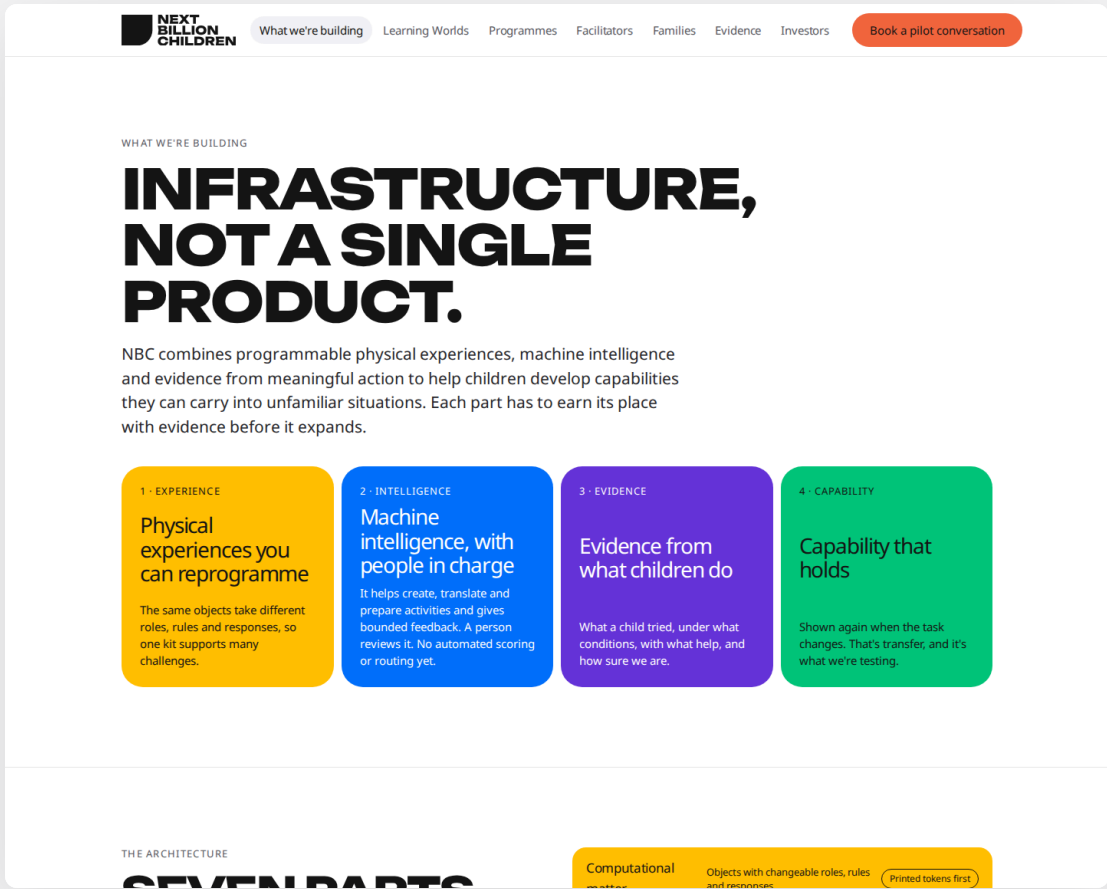

INFRASTRUCTURE, IN DAYLIGHT.

What we're building

Learning Worlds

Programmes

Facilitators

Families

Evidence

Investors

Book a pilot conversation

LEARNING WORLDS · WORKING NAME · THE FIRST OFFER

THREE WORLDS.
ONE CAPABILITY.

A Learning World is a reusable kit, a set of challenge cards and a facilitator plan. The first three look deliberately different but exercise the same idea, changing one thing at a time. That way we can see whether a child carries the idea from one world to another.

RAMP WORLD · READY FOR PILOTS

Make the car go farther.

Height, surface and start. Forces and fair tests.

PLANT WORLD · IN DESIGN

Which one grows taller?

Light, water and soil over two weeks.

SWING WORLD · IN DESIGN

Make it swing slower.

Length, weight and push.

Other capability families (making, collaboration, care, inquiry, adaptation, participation) come later, each with its own task design and evidence.

WHAT'S IN THE RAMP WORLD KIT

THINGS YOU CAN FIND ANYWHERE.

Chosen so a programme can replace anything that breaks from a local market. Instrument only what a real need justifies.

2 folding card ramps, 60 cm

1 toy car, the same one every run

Books or blocks of similar thickness

3 surface mats: carpet, card, tile

A tape measure in centimetres

6 challenge cards with printed tokens

A 45-MINUTE SESSION

CLEAR ENOUGH TO RUN ON DAY ONE.

MINUTES	CHILDREN	FACILITATOR
00-05	Hear the challenge; predict and say why	Reads the card; notes predictions
05-15	Build the ramp; run 1 and measure	Explicit instruction: what a fair test is
15-30	Change one thing; run again; compare	One tap per child: what they changed and with how much help
30-40	Explain: "How do you know?"	Asks the probe questions on the card
40-45	Tidy up; one sentence to take home	Confirms notes; checks the suggested next activity

Explicit instruction plus probe questions, not discovery alone. That's where published evidence for this capability is strongest.

TRANSFER

DOES IT HOLD WHEN THE WORLD CHANGES?

Weeks later, children meet a world they haven't seen, with no prompts. If they still change one thing and explain why, the idea may have transferred. These tasks stay private and are scored by someone who didn't teach the child.

See the child's screen

NEXT BILLION CHILDREN

READY-TO-RUN LEARNING.

The offer, the eight-week pilot and a pilot enquiry form. · read left to right

What we're building Learning Worlds Programmes Facilitators Families Evidence Investors [Book a pilot conversation](#)

FOR PROGRAMME OPERATORS AND FUNDERS

RUN MEANINGFUL PRACTICAL LEARNING.

You run hands-on sessions every week, and funders and families ask what children are learning. NBC gives you reusable experiences, clear facilitator guidance and a concise evidence summary that helps choose each child's next step.

Kits

A Learning World for up to six children per kit, from low-cost, replaceable materials.

Facilitator guidance

Two short training sessions, a printed card per challenge, and human support.

An offline app

One tap per child. Suggestions from the assistant are always checked by your facilitator.

An evidence summary

What children tried, with what help, and what to offer next. There are no scores or rankings.

THE PILOT

EIGHT WEEKS. ONE WORLD.

1

Week 0: ethics, consent, safeguarding and set-up

2

Weeks 1–2: facilitator training and first sessions

3

Weeks 3–6: sessions run by your facilitators

4

Week 7: a new, unfamiliar task, scored independently

5

Week 8: your evidence summary and a decision together

Price: set with each pilot site from a full cost sheet. We'd rather tell you the real cost than quote a number that doesn't hold.

WHAT WE KNOW. WHAT WE'RE TESTING.

Established, testing and not shown, plus how a record is kept. · read left to right

The collage consists of five screenshots from the 'Next Billion Children' website, illustrating their approach to building learning infrastructure for children in low-income countries.

Screenshot 1 (Top Left): The website's header includes the 'NEXT BILLION CHILDREN' logo and navigation links: 'What we're building', 'Learning Worlds', 'Programmes', 'Facilitators', 'Families', 'Evidence', 'Investors', and a 'Book a pilot conversation' button. The main headline reads 'ANSWERS ARE GETTING CHEAPER. CAPABILITY ISN'T.' Below this, a sub-headline states: 'Access to useful machine intelligence keeps expanding, unevenly. What remains costly is the chance for children to investigate, create, revise and show what they can do when circumstances change. NBC is building globally relevant learning infrastructure for that, through a focused, testable first offer.'

Screenshot 2 (Top Right): This section details the business model. It states: 'They're kept apart so no speculative revenue can rescue a weak learning business. Prices come from a full cost sheet and pilot logs; earlier model outputs are historical assumptions.' It lists three options:
- **CORE:** Learning service. Operator or site fee. A family subscription through the existing LMS is a separate test.
- **OPTION:** Shared intelligence service. Contracted useful workloads for operators or communities, only with repeat paid demand.
- **OPTION:** Creator and infrastructure services. Licensed experience packages and implementation, if rights-cleared and wanted.
A note mentions: 'The downside case has zero utility or contribution revenue. Child-data sales, tokens, assumed royalties and marketplace proceeds are excluded from the business case.'

Screenshot 3 (Middle Left): Under the 'ECONOMICS' header, it says 'THREE SEPARATE ACCOUNTS.' Below this, two boxes describe different offerings:
- **LONG-TERM DIRECTION:** The Human Capability Graph. A record of what a learner has demonstrated, under which conditions, with what help and with what uncertainty. It is a research and technical concept, earned through evidence. It is not a product today and not a credential.
- **FIRST OFFER:** Learning Worlds for programme operators. Reusable physical experiences, facilitator guidance and an evidence summary, for recurring hands-on programmes with children aged about 9-12, starting in Cape Coast.

Screenshot 4 (Middle Right): A section titled 'MILESTONES TIED TO EVIDENCE GATES' features a table with five gates.

GATE	QUESTION	PASSES IF	WHEN
0 - Ethics	Can we run this responsibly?	Ethics review, consent and assent, and a data-protection plan are in place	Week 0
1 - Delivery	Does it work without us?	Two external facilitators run repeated sessions within the quoted support	Weeks 1-6
2 - Learning feasibility	Are results interpretable?	Baseline and delayed results, explanations and failure patterns can be read; no claim from engagement alone	Weeks 5-8+
3 - Measurement	Can scorers agree, and does richer capture help?	A prespecified agreement criterion is met, uncertainty is reported, and richer capture changes a useful decision	Weeks 5-8
4 - Demand	Will programmes pay?	3 of 10 qualified, independently approached buyers make a meaningful paid commitment	Week 8
5 - Cross-context	Does it work where AI access differs?	Comparable-age tasks can be interpreted at a contrasting site	After the first site

Screenshot 5 (Bottom Right): A 'Request the deck' form with fields for 'Name', 'Fund or organisation', and 'Email'. A 'Request the deck' button is present. Below the button, it says 'Prototype: nothing is sent.' To the right, a 'DATA ROOM - AVAILABLE ON REQUEST' section lists:

- Thesis and strategy (v5)
- Eight-week pilot protocol and ethics plan
- Cost sheet method and the three accounts
- Evidence register with labels
- Forecast register with resolution rules

Screenshot 6 (Bottom Left): The footer includes the 'NEXT BILLION CHILDREN' logo with the tagline 'Turn intelligence into capability.' and navigation links: 'EXPLORE' (What we're building, Learning Worlds, Child preview, Evidence), 'FOR' (Programmes, Facilitators, Families, Investors), and 'COMPANY' (About, Book a conversation, About this prototype).

Screenshot 7 (Bottom Center): A partial view of a section titled 'Key risks, stated plainly' and 'Team and ask'.

42

THE PLAYBOOK

Why this identity matters to the business, and how we built it.

HOW IT SERVES THE BUSINESS

THE FIRST IMPRESSION IS PART OF THE PRODUCT.

Programme owners decide in seconds whether NBC looks credible and relevant. These assets carry our offer, and Algo Peers' five-year record, into every first impression.

BUILT IN EIGHT MOVES

01 Set message levels and colour jobs.

02 Drew two concepts, then five simpler options.

03 Chose the piece; rebuilt it in one colour.

04 Wrote graphic v1, reviewed it, rewrote it for the buyer.

05 Built website v1, audited it against the thesis.

06 Rebuilt the site in daylight as v2.

07 Designed the social kit and signature.

08 Published every asset and the full guide.

WHERE IT GOES NEXT

BUILT ON WHAT WE LEARNED. READY FOR WHAT COMES.

IT GREW OUT OF RESEARCH.

Market research named our first buyer, the programme owner. Every v2 asset speaks to that buyer, in their words.

IT TRAVELS WITH EVERY OFFER.

Each outreach message, pilot offer and investor email now carries the same look, supporting 10 offers by Tue 20 Oct.

IT SCALES TO EVERY WORLD.

One colour per job and one shape for everything: new Learning Worlds and new countries use the same kit.

MEANWHILE

What else moved this week.

TEN CONVERSATIONS, UNDER WAY.

- The [market research playbook](#) is published: 10 watering holes, 20 messages, 10 interviews.
- Interviews ran from Wed 30 Sep to Tue 6 Oct; each one goes into the [interview tracker](#) as it is completed.
- Next decision, Wed 7 Oct: which problem, and which buyer.

OUR IDEAS STAY OURS UNTIL THEY ARE PROTECTED.

- We reviewed both public repositories: no personal or children's data found.
- Prototype demo materials moved out of public view until we have patent advice.
- Public materials describe inventions at vision level only. Next: a patent attorney or university clinic.

GHANA'S DIGITAL MINISTRY IS IN THE ROOM.

- Met Ghana's Minister of Communication and Digital Innovation at the Harvard Kennedy School.
- We shared the vision: learning infrastructure where children build, experiment and develop capabilities with shared AI, starting in Ghana.

BUILT WITH EDUCATORS, FROM THE FIRST VERSION.

- Our team in Ghana met the Director of the Ghana Education Service (GES), Cape Coast.
- We are exploring an MOU for pilot testing, so that the educator community builds the first version of the physical computing stack with us.
- No MOU is signed yet; the next step is a written pilot proposal.

INVITED, APPLIED, AND RECOGNISED.

- **Navab Social Innovation Fellowship:** invited to interview.
- **TNT accelerator:** applied after the TNT build night for \$200,000 pre-seed investment for 2.5% equity; decision pending.
- **Founder:** Sam Quansah is a Mandela Washington Fellow.

THE NEXT FOUR WEEKS.

WEEK 2

30 Sep – 6 Oct

Interviews; this identity

Wed 7 Oct: problem and buyer

WEEK 3

7 – 13 Oct

Costed pilot offer; five-second asset tests

One offer, one learning claim

WEEK 4

14 – 20 Oct

Usability sessions; offers to 10 buyers

Tue 20 Oct: 10 offers out

WEEK 5

21 – 27 Oct

Outside facilitators deliver

Kit, programme or redesign

Weeks run Wednesday to Tuesday.
